Magento community

One of the most important things with Magento is that it's had a big community for many years. Which means that you can find articles and tutorials about almost anything you need. If you have a problem in Magento, you can be sure that someone has already solved it. So in most cases all you need to do is to find it on the forums. There's no need to reinvent the wheel.

These forums will provide you a network of dedicated Magento enthusiasts sharing tips, tricks and support.

• Magento Stack Exchange (Q&A):
