Introducing to Magento Booking Pro extension

Magento booking extension helps you efficiently manage your booking process. It allows creating and managing all kind of booking products with ease.

Magento booking pro from Magenest provides following key features:

1. Set multiple flexible price rules. You have the options to set different prices for different days, different times and different types of the same product.
2. Allow multiple booking for the same time based on available quantity of the bookable products.
3. Allow integrate to Google calendar. When customers book any booking product, they will choose the time for this product/service in the calendar.
4. Easy for managing bookings.

Configuration

Go to **System -> Configuration -> HUNGNAM -> Bookable product**

The screenshot shows the Magento Admin configuration interface. On the left, there's a sidebar with a tree structure under 'Configuration'. The 'GENERAL' section is expanded, showing 'General', 'Web', 'Design', 'Currency Setup', 'Store Email Addresses', 'Contacts', 'Reports', and 'Content Management'. Below that, the 'HUNGNAM' section is expanded, showing 'Bookable product'. At the top right, there's a 'Save Config' button. The main area is titled 'Bookable product' and contains a 'Notification' tab. Under 'Notification', there are four settings: 'Enable' (set to 'No'), 'Email sender' (set to 'General Contact'), 'Email template for confirm booking' (set to 'Default Template from Locale'), and 'Email template for cancel booking' (set to 'Default Template from Locale').

Notification : set email sender and email template

Creating Booking Product

Apart from default product types of Magento, Magenest extension allows you to create new product type- booking product.

They are 2 ways to create this product type

1. Go to **Bookings Create Booking**

Newsletter CMS Reports System Bookings

ty risks. We strongly recommend to Enable Form Key Va
riences with Integrated Payment, Tax, and Shipping Solu

Subject

Content

Send

-
- **Select Product:** select the booking product type.
 - **Select Booking Status:** select the status of the product(complete, paid, confirm, unpaid, ...)
 - **Subject:** the title of the email you send.
 - **Content:** the email content.

After the email is sent, the customer who purchased the selected product in the field "**Select Product**" will receive the confirmation email. This email will be sent only once, customers who have received previous emails will not receive them again.

Updates

-
- When a bug fix or new feature is released, we will provide you with the module's new package. All you need to do is repeating the above installing steps and uploading the package onto your store. The code will automatically override.
 - Flush the config cache. Your store and newly installed module should be working as expected.

Support

- We will reply to support requests within **2 business days**.
- We will offer **lifetime free update and 6 months free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
- Support **DOES NOT** include other series such as customizing our products, installation and uninstallation service.

Once again, thank you for purchasing our extension. If you have any questions relating to this extension, please do not hesitate to contact us for support.
