Introduction

Hipay Payment extension for Magento 2 by Magenest is a global provider of payment processing service, with operations in more than 150 countries worldwide. The company supports over 220 methods of payment across multiple channel, from online to mobile and brick-and-mortar. All platforms are integrated to give customers a seamless shopping experience. Hipay is the only payment company that offers customized payment solutions for each country. With many advanced functions such as 360-degree Customer View, Optimized Conversion and Comprehensive Fraud Protection.

Highlight Features

- A lot of features is included in the extension that you can tweak to make it best suit your business, including:
 - Choose between Authorize Only or Authorize and Capture.
 - New order status.
 - Email customer.
 - Allowed credit card types.
 - Enable CVC verification.
 - Allowed country.
 - Order total threshold.
- Easily manage orders
- Easily capture, cancel and refund payments.

System Requirements

Your store should be running on Magento 2 Community Edition version 2.1.x.

Configuration

Set up from Hipay home page

When having Hipay account, you will register a new website and take API Webservice Login and API Webservice Password. This API provides integrators and developers the means to use web services that communicate between Hipay home page and the Magento system.

After registering website successfully, you click **Merchant Tool Kit/API** on the Dashboard menu. The result is displayed in a below table:
