### Introduction

ANZ is one of the largest banks in Australia and New Zealand. The bank has expanded to more than 30 countries all over the world. By using ANZ secure payment gateway, you will ensure that customers will trust your store more with higher payment security while the enterprises could assure that no fraud happens and causes to lose money. In addition, with ANZ Payment and Subscription, you are able to provide customers with the choice to subscribe to your product. By joining the subscription industry which is growing in size, you will gain more revenue and sales. We provide your customers with flexible options so you can focus more on your business.

### Highlight Features:

- Allow customers to checkout via debit cards and credit cards with various types of payment cards including Visa, MasterCard, American Express and Diners Club International.
- Guarantee merchants with 3D Secure Checkout, checking for fake card information.
- Payment gateway customization, giving customer a better checkout experience.
- Report of transactions, keeping control of all orders and invoices.
- Various tools for theft and fraud protection.

### System Requirements

Your store should run on **Magento 2 Community Edition version 2.1.x**.

---

### Configuration

#### Set up the Integration on Magento 2

First of all, login Magento backend, follow this direction **Stores -> Configuration -> Sales -> Payment Methods**. After that, fill information about **Merchant Access Code, Secure Secret, Merchant ID, AMA User, AMA Password** which are configured between ANZ and Magento:  
[blocked URL](#)

Remember **Save Configuration**, your configuration is ready to use.

### Main Functions

#### Easily Checkout

At frontend, Customer will need to choose an item and click on **Add to Cart** button:

[blocked URL](#)

Customers can choose two methods: **ANZ eGate Merchant Hosted Payment Gateway** or **ANZ eGate Server Hosted Payment Gateway**.

[blocked URL](#) Pay with **ANZ eGate Server Hosted Payment Gateway**:

[blocked URL](#)

Click **Continue** button. Payment page directed to the ANZ payment gateway. Customers choose card type:

[blocked URL](#)

Customers fill in **Card number**, **Expiry date**, **Security code** and click on **Enter payment** button on your left corner.

[blocked URL](#)

If the transaction is successful, the system will inform order number in home page and send Invoice to confirm via email.

[blocked URL](#)

[blocked URL](#) Pay with **ANZ eGate Merchant Hosted Payment Gateway**:  
[blocked URL](#)

Following steps are the same to paying via **ANZ eGate Server Hosted payment gateway**.

[blocked URL](#) Support 3D secure card:

In ANZ eGate Payment Gateway extension, your payment transaction will be supported by 3D secure card with all methods.  
Step 1: Choose the type card with 3D secure and fill merchant's information

Step 2: The system will interact with the bank and send request to confirm when customer enter OTAC:

[blocked URL](#)

Every workflow still continues until the transaction is complete.

**Note: The system will display different interfaces depending on the host bank that supports the card.**

[blocked URL](#) To View Orders, click **Sales->Orders-> View**:

[blocked URL](#)

You can view order details: Order & Account Information, Invoices, Address Information, Payment & Shipping Method, Items, Order total.  
[blocked URL](#)

Refund the payment, click **Sales->Invoices->View --> Credit Memo-> Refund**

[blocked URL](#)

[blocked URL](#)

Check the status of refunding in **Credit Memos**.

**NOTE:**

**All of the payment's process operate in ANZ's payment site, not in Magento.**

---
