

Translate Wordpress module to other language using Loco Translate

Thank you for purchasing our modules.

For all of our [WooCommerce modules on Codecanyon](#), the default language is English. In case you want to translate the module into another language /your language, we recommend using a module called Loco Translate.

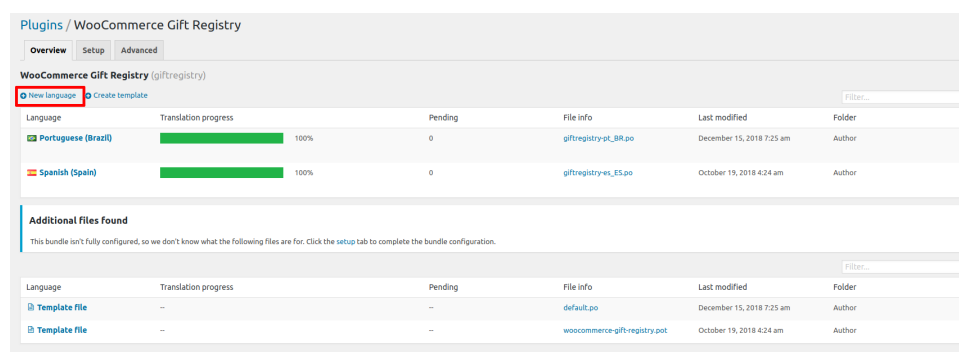

In this document, we will guide you on how to translate a Wordpress module to other languages with Loco Translate.

[blocked URL](#)

1. Download and install [Loco Translate](#)
2. In **Loco Translate > Running plugins**, choose the module you want to translate.
For example, we will choose the WooCommerce Gift Registry module.

[blocked URL](#)

3. In the Overview section, choose **New Language**

4. On the New language page,
+ Choose a language: Select the language you want to translate the module to in the Wordpress language
+ Choose a location: The location to save .po file - Choose Author.
Then **Start Translating**.
