

Translate Wordpress module to other language using Loco Translate

Thank you for purchasing our modules.

For all of our [WooCommerce modules on Codecanyon](#), the default language is English. In case you want to translate the module into another language /your language, we recommend using a module called Loco Translate.

In this document, we will guide you on how to translate a Wordpress module to other languages with Loco Translate.

[blocked URL](#)

1. Download and install [Loco Translate](#)
2. In **Loco Translate > Running plugins**, choose the module you want to translate.
For example, we will choose the WooCommerce Gift Registry module.

[blocked URL](#)

3. In the Overview section, choose **New Language**

Plugins / WooCommerce Gift Registry

Overview Setup Advanced

WooCommerce Gift Registry (giftregistry)

[New language](#) [Create template](#)

Language	Translation progress	Pending	File info	Last modified	Folder
Portuguese (Brazil)	100%	0	giftregistry-pt_BR.po	December 15, 2018 7:25 am	Author
Spanish (Spain)	100%	0	giftregistry-es_ES.po	October 19, 2018 4:24 am	Author

Additional files found

This bundle isn't fully configured, so we don't know what the following files are for. Click the [setup](#) tab to complete the bundle configuration.

Language	Translation progress	Pending	File info	Last modified	Folder
Template file	--	--	default.po	December 15, 2018 7:25 am	Author
Template file	--	--	woocommerce-gift-registry.pot	October 19, 2018 4:24 am	Author

4. On the New language page,
+ Choose a language: Select the language you want to translate the module to in the Wordpress language
+ Choose a location: The location to save .po file - Choose Author.
Then **Start Translating**.

[blocked URL](#)

5. In the Editor, choose the title, text you want to translate, then enter the translation for it.
When the translation is done, click **Save**.
