## Introduction

By default, wordpress do not support vertical mega menu of product categories. Even you use a plugin that support mega menu , it does not support vertical mega menu of product categories.After install our module and click on self explanatory configuration you will have a elegant mega menu of product category.

## Configuration

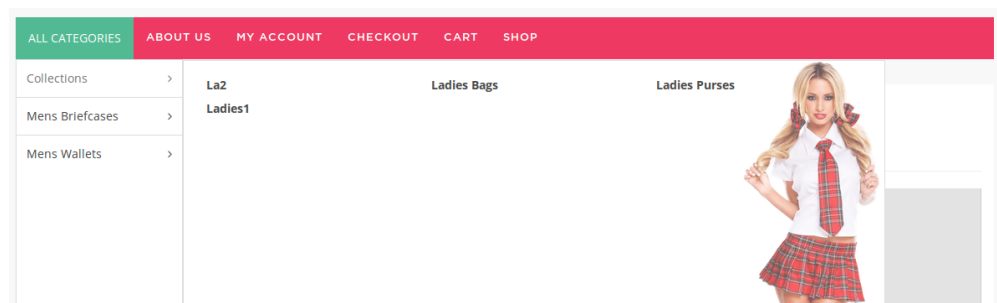

Login as admin,click on *Woocommerce Setting* then click on tab *Category menu*

1. You check the check box *Display category mega menu* to enable product category
2. Mega menu position : due to your selected option It will display mega menu from left to right or right to left
3. Accordion menu position : due to your selected option It will display accordion from left to right or right to left

The module will display the thumbnail image of the first level of product category so please using a transparent, beautiful image as the thumbnail for category

Example of product category mega menu

The module add the widget product category accordion .
