Introduction

Magento 2 Opayo and Subscription Extension is the most secured payment gateway in UK. Opayo Payment is formerly known as Sage Pay Payment.

Payment + Subscription

Highlight Features

- Allow admins to integrate their Opayo account to their Magento stores.
- Allow customers to checkout using credit card payment
- Enable or disable the gateway.
- Keep revenue coming consistently with the subscription plan manager.
- Specify allowed credit card types and countries.
- Secure payment info with iFrame payment.
- Support multiple stores.
- Integrate Save Card Function.
- Choose between Authorize Only or Authorize and Capture.
- Add a layer of security with 3D Secure Checkout.
- Enable CVC verification.
- Customers can capture invoices up to the quantity of product that they desired.
- Admins can easily check transaction history.
- Admins can easily manage profiles in the backend.
- Customers can also manage their profiles and cancel them if desired.
- Admin can create a credit memo for refunding.
- Easily perform Gift Aid enabled in Opayo.
- **3D Secure version 2 available in Opayo Direct Method** (Learn more about 3D secure ver 2 in [here](#)).

System Requirements

Your store should be running on Magento 2 version **2.1.x; 2.2.x, 2.3.x, 2.4.x**

Video Tutorial

Configuration

Firstly, you have to configure the Opayo Payment Extension at Magento's back end by clicking on **Stores > Configuration > Sales > Payment Methods > Opayo Payment Gateway**.

Opayo Global Config

Fill in **Vendor Name**, **Integration Key**, **Integration Password** obtained from your Opayo credentials. (Click on Create API credentials)

In our example, we use the account and API of Opayo to implement transactions in **test mode**. You can obtain this by going to <https://test.Opayo.com/myOpayo/transactions.msp>

The screenshot shows the 'Administrator Account Details' page in the Sage Pay Magento extension. The page has a green header with a TLS 1.2 update notice. A sidebar on the left contains navigation links: Settings, News, Administrator, Settings, AVS/CV2, 3D Secure, Restrictions, Valid IPs, Change Log, Users, Pay Methods, Surcharges, and Page Customiser. The main content area is titled 'Administrator Account Details' and includes a sub-header 'Primary admin account settings'. It contains fields for Username, Email address, Email validation status (Validated), and Receive updates and communications (No). There is an 'Edit' button. Below this is the 'Password details' section with fields for Primary Admin Password and Form Integration Encryption Password. A 'Sage Pay API' section includes a 'Create API credentials' button and a checkbox for understanding the implications of creating new credentials. At the bottom, it shows 'My Sage Pay last accessed on: 27/06/2018 04:03:54'.

3D SECURE VER 2

Note: 3D secure version 2 is available in Opayo Direct method only.

The screenshot shows two configuration options. The first is 'Enable 3D Secure V2 [website]' with a dropdown menu set to 'Yes'. The second is 'Browser Javascript Enabled [website]' with a dropdown menu set to 'Yes'. Below these is a description: 'Boolean that represents the ability of the cardholder browser to execute JavaScript.'

- **Enable 3D Secure Ver 2:** choose Yes to enable 3D Secure version 2, which contains many improvements to make it easier to achieve SCA on e-commerce transactions.
- **Browser Javascript Enabled:** choose Yes to enable the browser Javascript.

+ Turn on **Test Mode** when you use test credentials. Choose the **Live Mode** when you go live.

You can also turn on **Ignore address check** to skip the address and postcode check-in test mode.

Maximum Order Total

+ Payment Action: You can choose between Authorize Only (Deferred) and Authorize and Capture (Payment)

- **Authorize Only:** check for the card for validity but not charge the account yet until the order is approved and invoiced.
- **Authorize and Capture (Payment):** charge the debit/credit card at the time the order is placed.

+ New Order Status: Processing, Suspected Fraud

- **Processing:** The payment is made successfully and an order invoice is issued.
- **Suspected Fraud:** No invoice is issued.

+ Credit Card Types: You can choose which credit card types you want by choosing one or more items.

+ Payment from Applicable Countries:

- **All allowed countries:** Enable all allowed countries to make payment.
- **Specific Countries:** Restrict some countries by unselecting them from the **Payment from Specific Countries**.

In addition, you can add/edit the **Instructions** to instruct customers on how to do the payment.

+ Sort Order: The order of the payment method that will be displayed on the checkout page.

+ Minimum Order in Total: If the order value is less than this figure, the payment method will not be displayed on the checkout page.

+ Maximum Order in Total: If the order value is bigger than this figure, the payment method will not be displayed on the checkout page.

Save Configuration.

Integrate with Paypal

To integrate Opayo Payment with your Paypal, please navigate to <https://test.Opayo.com/myOpayo/transactions.msp>

On the left menu column, choose **Pay methods** then add your Paypal account on the right in the **Use PayPal Express Checkout with Opayo**

Please read these documents from Opayo for more details:

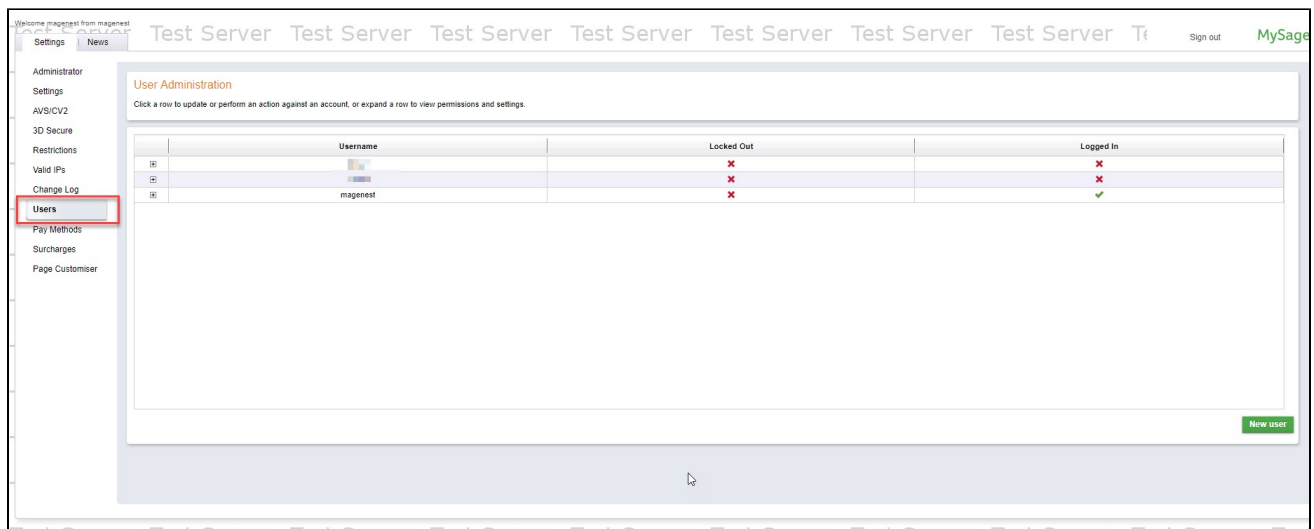

<https://www.Opayo.co.uk/support/12/36/adding-paypal-to-your-test-account>

<https://www.Opayo.co.uk/support/12/36/enabling-sage-pay-on-your-paypal-test-account>

<https://www.Opayo.co.uk/support/16/36/linking-paypal-to-your-live-account>

Create User in Opayo

In Opayo page, choose Users in the Settings, then create a user by clicking on the **New user** button. You will use this user account to link Paypal with your Opayo

Opayo Form Integration/Paypal

+ Enabled: Enable Opayo Form with Paypal option

+ Title: The title of the payment method displayed on the checkout page

+ Payment Action: You can choose between Authorize Only (Deferred) and Authorize and Capture (Payment)

- **Authorize Only:** check for the card for validity but not charge the account yet until the order is approved and invoiced.
- **Authorize and Capture (Payment):** charge the debit/credit card at the time the order is placed.

Capture Invoice

If you set the Payment Action as **Authorize Only**, the invoice will not be created. You have to capture invoice in your request. However, the quantity of the products in the new invoice must be smaller than or equal to the pre-order.

⚠ This extension does not support multiple invoices.

Update

- When a new update is available, we will provide you with a new package containing our updated extension.
- You will have to delete the module directory and repeat the installing steps above.
- Flush the config cache. Your store and newly installed module should be working as expected.

Support

- We will reply to support requests within **2 business days**.
- We will offer **lifetime free update and 6 months free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
- Support **DOES NOT** include other series such as customizing our products, installation and uninstallation service.

Once again, thank you for purchasing our extension. If you have any questions relating to this extension, please do not hesitate to contact us for support.
