Introduction

Magento 2 Reward Points by Magenest is a Loyalty Program that helps store owners to reward and manage the rewarding points given to customers.

Highlight Features

For Customers

- + Customers can earn points by:
 - Purchasing products in the store.
 - Purchasing a specific type of product.
 - Signing up to store.
 - Reviewing a product.
 - Subscribing to the newsletter.
 - Sharing the referral code to their friends
 - Gifting on the customer's birthday.
- + Customers use points to get a discount (for example 10 points can be redeemed for 1\$ discount).
- + Customers can manage their reward points in My Reward Points Dashboard: view rewarded points and point transaction history.
- + Customers (both logged in users and guests) can view the points earned alongside the product price on the product page, category page.

For Admin

- + Easily configure new point earning rules for customers:
 - ★ Rule Types:
 - Behavior rules: Rule relevant to Event.
 - Catalog rules: Rule relevant to Product.
 - ★ Conditions:
 - Behavior rules: List of events to trigger reward points action (product's review, customer registration,...).
 - Catalog rules: Attribute of products to trigger reward points action (attribute set, category...).

- + Admin can add or deduct points to the user manually.
- + Admin can check the transaction history of all users
- + Admin can create a membership [New]

System Requirement

Your store should be running on Magento 2 Community Edition version 2.1.x, 2.2.x; 2.3.x.

Video Tutorial

Configuration

In Magento 2 back end, go to **Stores > Configuration > Magenest > Reward Points**.

The screenshot shows the Magento 2 Configuration interface for the 'Reward Points' module. The left sidebar contains navigation menus for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area is titled 'Configuration' and shows the 'Reward Points' module selected under the 'MAGENEST' category. The configuration is divided into three sections: General, View Settings, and Label Display Settings. In the General section, the 'Enable module' is set to 'Yes'. The View Settings section includes options for showing points earned on the Home page, Product Listing page, Product Detail page, and for Guest users, all set to 'Yes'. The Label Display Settings section includes options for Point unit (set to 'P'), Text size (set to '14'), and Text color (set to '#000000'). Each setting has a 'Use system value' checkbox.

General setting

- + **Enable module:** Choose Yes to enable Reward Points module.

View settings

- **Show number of points earned for each product on the Home page:** Display reward points for each product on the home page.
- **Show number of points earned on the Product Listing page:** Display reward points for each product on the product list.
- **Show number of points earned on Product Detail page:** Display reward points for each product on the product detail page.
- **Show number of points earned for Guest:** If enabled, the points earned will be shown to guests as well

View Settings

Show number of points earned for each product on Home page [store view] No Use system value

Show number of points earned on Product Listing page [store view] Yes Use system value

Show number of points earned on Product Detail page [store view] Yes Use system value

Show number of points earned for Guest [store view] Yes

Label Display Settings

- + **Point unit:** Your custom point unit will be added after the number of points. For example, your reward points unit is "Points", then the point display will be +10 Points. If you leave this field blank, the default unit is P.
- + **Text size:** The font size of the reward points.
- + **Text color:** The color of the reward points.

Label Display Settings

Point unit (default: P) [store view]
 E.g: if set as P, the label with be displayed as + 10 P.

Text size (px) [store view]

Text color [store view]

Point Settings

- + **Point redemption rate:** This defines how many points are worth a single currency unit (e.g \$1). For example: Point redemption rate = 10, the customer gets a \$1 discount for every 10 points spent.
- + **Enable point earning for order with applied points:** Choose Yes to allow customers to earn points for the orders that have been discounted with reward points. If you choose No, customers will not earn points from these orders.
- + **Enable points earning for order with discount:** Choose Yes to allow customers to earn points for the orders that have been discounted. If you choose No, customers will not earn points from these orders.
- + **Deduct reward points earned when order is refunded:** Choose Yes to enable the function to deduct receivable points according to price after discount. For example, for an order of a \$10 item, the total amount after the discount is \$7, then reward points will be counted based on new price (\$7). Note that this deduction **does not** apply for reward point rule with fixed points.
- + **Return reward points when refund order:** Allow returning the applied reward points along with a refunded order.
- + **Point rounding rule:** You can choose to round the decimal number of points up (ceiling) or down (flooring).
- + **Point expiry time:** The expiry time of the points can be set in days. The maximum time is 1000 days. If you fill in 0, the points will never expire.
- + **Points are rewarded when order is:** Set the order status to reward points to the customer's point balance.
- + **My Reward Points tab description:** You can add the description as your loyalty program's terms and conditions. This description will be displayed in the customers' My account page.
- + **Reward Points program landing page:** Choose one CMS page to set as a landing page. There is a Reward Points CMS page by default.
- + **Display landing page link in footer:** Enable this option to add a landing page to the page footer menu.

+ Enable reward points notification: Notify guests at the cart page to sign up for reward points.

Point Settings

Point redemption rate [store view] Use system value
This defines how many points are worth a single currency unit (e.g \$1).
For example: Point exchange rate = 10, customer gets a \$1 discount for every 10 points spent.

Enable point earning for orders with applied points [store view] Use system value
If No, when customer uses reward points for discount on an order, customer will not receive points for this order.

Enable point earning for orders with applied coupon [store view] Use system value
If No, when customer applies coupon on an order, customer will not receive points for this order.

Deduct receivable points when customers use discounts [store view] Use system value
If Yes, when customer uses reward points for discount or applies coupon on an order, the amount of points earned will be reduced accordingly.

Deduct reward points earned when order is refunded [global] Use system value

Point rounding rule [store view] Use system value
Eg: 2.1 -> 3 (Round Up) / 2.1 -> 2 (Round Down)

Point expiration time [store view] Use system value
The duration before reward points expires after they're earned: 1 - 1000 (days). Choose 0 if you want to turn off this feature.

Points are rewarded when an order is [global] Use system value
Pending
Processing
Suspected Fraud
Complete
Closed
Canceled
On Hold
Order statuses used to validate used points (modify this only if you know what you are doing)
Default values: Processing and Complete.

My Reward Points tab description [store view] Use system value
Each time you shop with us, you automatically get rewarded. With every purchase you make, you can start earning Points to spend on your future purchases. The more you shop, the more points you earn and the more you can use to spend. Buy more, save more!
Write a short description for your customer's My Reward Point tab. You should specify the Earning and Spending Rules of your store.

Reward Points program landing page [store view] Use system value

Display landing page link in footer [store view] Use system value

Enable reward points notification [store view] Use system value
Notify customers about reward points when they place orders (for customers who have not yet registered an account)

Point Redemption Rules

- **Enabled:** Choose **Yes** to enable the point redemption rule for each order
- **Redeemable points**

Fixed number: Set the maximum reward points a customer can use in an order

- **Maximum number of redeemable points:** If the field is left blank or set as 0, the maximum points spent will be by default.

Point Redemption Rules ⌵

Enabled [store view] Yes Use system value

Redeemable points [store view] Fixed number Use system value

Maximum number of redeemable points [store view] 50 Use system value

Unit: point(s). Enter the maximum number of points can be redeemed for an order. If it is 0, there is no limitation.

Percentage of total order value: Set the percentage of points that could be spent in an order. *E.g.* If the customer has 100 points, and this field is set at 50% on the backend, and the order price is 200\$, the customer will only be able to spend the amount of total order price x 50%(this amount will not exceed the total reward points you're having), which is: $200 \times 50\% = 100$.

- **Percent of redeemable points:** If the field is left blank or set as 0, the maximum percentages spent will be by default.

Point Redemption Rules ⌵

Enabled [store view] Yes Use system value

Redeemable points [store view] Percent of total order value Use system value

Percent of redeemable points [store view] 20

Unit: %. The number of redeemable points for an order is calculated as percent of total order value.

Email Configuration

+ Point Expiration Notification

- **Notify Customers When They Login:** Choose **Yes** to notify the customer about the upcoming expired reward points when they login to your site.
- **Send Email To Notify Customer About Point Expiration:** Choose **Yes** to send reminder emails to the customer about the upcoming expired reward points.
- **Email template:** Choose the corresponding email template.
 - **⚠ Note:** To change the Email template, go to **Marketing > Email Template**. The instruction to create a new Email Template can be found [here](#).
- **Send Before:** Admin can set the days for the email to be sent before the expiration date. If the field is left blank or set as 0, no reminder notification will be sent.

+ Point Balance Update Email

- **Enabled:** Choose **Yes** to send a notification email to customers when their point balance changes.
- **Email template:** Choose the corresponding email template.

Email Configuration

⊖ Point Expiration Notification

Notify Customers When They Login [store view] Yes

Send Email To Notify Customer About Point Expiration [store view] Yes

Email Template [store view] Send an email notifying you about your expiry point (Default)
Select an email template used to send customers before a transaction expires.

Send Before [store view] 2
Day(s). If empty or zero, no reminder notify is sent.

⊖ Point Balance Update Email

Enabled [store view] Yes

Email Template [store view] Send balance update email (Default)
Select an email template used to send customers when their point balance is updated.

Refer a Friend

+ General

- **Refer By Link:** Allow customers to refer a friend with a referral link.
- **Path of Referral Link:** Fill in the URL key after the domain. For instance, with the path "customer/customer/account", the referral link follows this format <https://yoursite.com/customer/account/create?referralcode=XXXXXXXXXXXX>
- **Referral code patterns:** The referral code format. [A5] means to generate 5 random alphabetical characters, [N4] will generate 4 random numbers. "Magenest" is the hard code
Example: Magenest-[A3][N2] will generate code like Magenest-af123 or Magenest-af09 ...

Refer A Friend

⊖ General

Refer By Link [store view] Yes

Path of Referral Link [store view] customer/account/create
For example, customer/account/create (Referer link will look like: <https://yoursite.com/customer/account/create?referralcode=XXXXXXXXXXXX>)

Referral Code Pattern [store view] [A2][N1][A2]Magenest[N1][A1]
A2 means 2 alphabetical characters, N1 means 1 numeric character, ... For example: [A2][N1][A2]Magenest[N1][A1]

+ Setting

- **Referral Points Are Awarded To:** Select the receiver of the referral points. You can set the receiver as the referrer, the referred friend, or both.
- **Referral Coupon Are Awarded To:** Select the receiver of the referral coupons. You can set the receiver as the referrer, the referred friend, or both.
- **When coupon is sent to the Referee**
 - **Sign up a new account:** When the referred friend signed up a new account.
 - **Sign up and make a purchase:** When the referred friend signed up and made the first purchase.
- **When coupon is sent to the Referrer**

- **Sign up a new account:** When the referred friend signed up a new account.
- **Sign up and make a purchase:** When the referred friend signed up and made the first purchase.
- **Send Referral Link To Friend Email Template:** Choose a corresponding email template.
- **Send Coupon To Referee Email Template:** Choose a corresponding email template.
- **Send Coupon To Referrer Email Template:** Choose a corresponding email template.
- **Apply Shopping Cart Rule To Referee:** Choose a corresponding cart price rule.
- **Apply Shopping Cart Rule To Referrer:** Choose a corresponding cart price rule.
 - **⚠️ Note:** The **Promotion Rule** must meet the requirements (If you can't see your promotion rule, please re-configure the promotion rule as below):
 - Is Active.
 - Coupon: Specific Coupon.
 - Coupon: Use Auto Generation

⏪ Setting

Referral Points Are Awarded To [store view] Use system value

Referral Coupon Are Awarded To [store view] Use system value

When coupon is sent to the Referee [store view] Use system value

When coupon is sent to the Referrer [store view] Use system value

Send Referral Link To Friend Email Template [store view] Use system value
%name - Name of receiver/the referred, %sender_name - Name of sender/referrer, message - Message, referral_url - Referral Url

Send Coupon To Referee Email Template [store view] Use system value

Send Coupon To Referrer Email Template [store view] Use system value

Apply Shopping Cart Rule To Referee [store view] Use system value
The Promotion Rule must meet the requirements (If you can't see your promotion rule, please re-configure the promotion rule as below):
- Is Active.
- Coupon: Specific Coupon.
- Coupon: Use Auto Generation

Apply Shopping Cart Rule To Referrer [store view] Use system value
The Promotion Rule must meet the requirements (If you can't see your promotion rule, please re-configure the promotion rule as below):
- Is Active.
- Coupon: Specific Coupon.
- Coupon: Use Auto Generation

+ After enabling the referral code function, go to **Marketing > Reward Points > Rules** and create a behavior rule - **Refer a friend**.

Membership

- **Enable Membership:** Choose Yes to enable Membership.
- **Membership Description:** You can add the description as your membership program's terms and conditions.
- **Email notification:** Choose Yes to send email to customers when they level up.

Membership

Enable Membership [store view] Yes

Membership description [store view] Show / Hide Editor

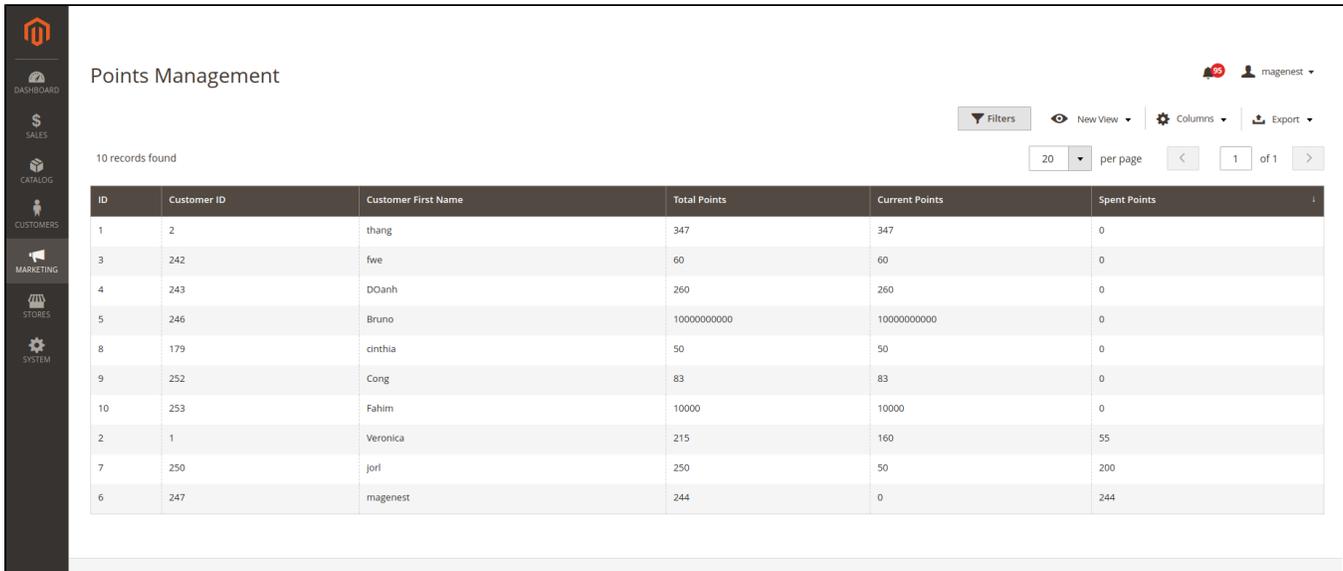

Write a short description for your customer's Reward program(s) tab.

Email notification [store view] Yes

Send email to customer when they level up.

Create a reward rule

- + You can add a new reward rule on the Rule Manager page.
- + On the left menu, go to **Marketing > Reward Points > Rules > New Rule**.

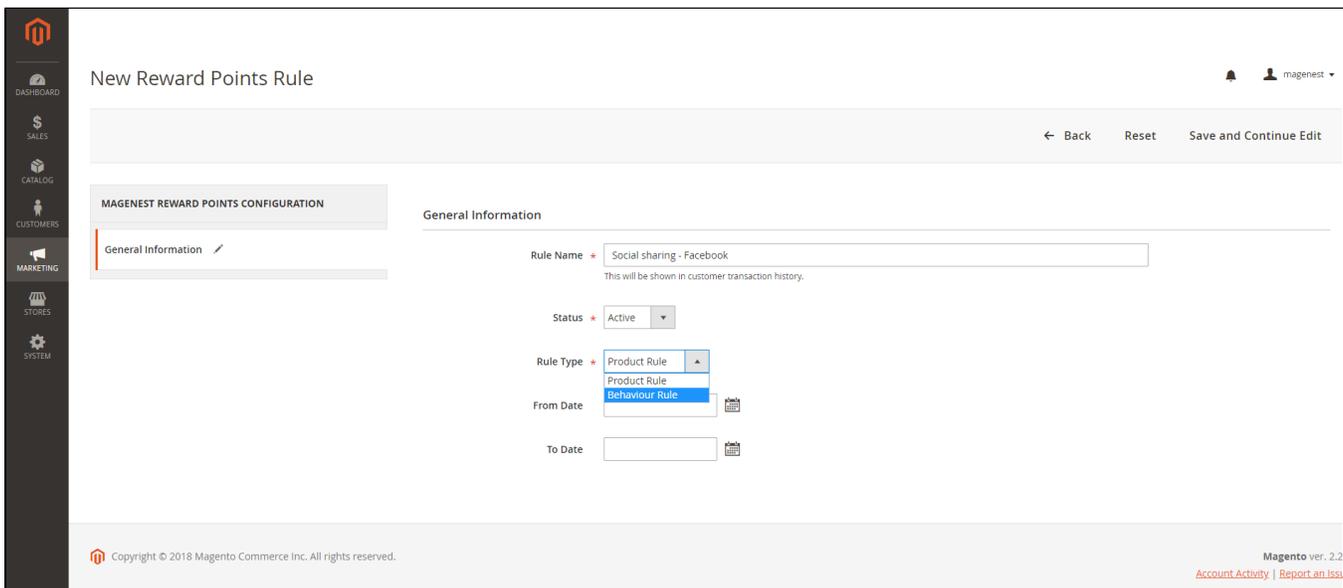

The screenshot shows the 'Points Management' dashboard. It features a sidebar with navigation options: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, STORES, and SYSTEM. The main content area displays a table with 10 records found. The table has columns for ID, Customer ID, Customer First Name, Total Points, Current Points, and Spent Points. The user 'magenest' is logged in, and there are 25 notifications.

ID	Customer ID	Customer First Name	Total Points	Current Points	Spent Points
1	2	thang	347	347	0
3	242	fwe	60	60	0
4	243	DOanh	260	260	0
5	246	Bruno	10000000000	10000000000	0
8	179	cynthia	50	50	0

Behavior Rule

+ Set the rule based on customers' behaviors.

4

ID	Event Name	Description
1	Customer signs up in store	When customers create a new account on your site, they will receive corresponding reward points according to the created rule in the back end.
2	Customer writes a product review	When customers write reviews for a product, they will receive corresponding reward points according to the created rule in the back end. Note: The points will only be given when the reviews are approved by the store owners.
3	Customer subscribes to newsletter	When customers subscribe to the newsletter, they will receive corresponding points according to the created rule in the back end.
4	Customer birthday	Customers will receive the reward points on their birthday.
5	First-time purchase	Customers will earn points for their first order

6	Lifetime Amount	When customers' spending reach an amount that is set by admin, customers will receive reward points
7	Customer Gratitude	When a customer number X registers a new account after a specific number of user accounts created. E.g: The customer will receive reward points (Admin configuration) if he/she is the 1000th signed-up user.
8	Refer a friend	When customers refer the store to their friends, referrer and/or referee can earn reward points. Learn more

+ Notification Settings

- **Notification Status:** You can enable or disable the notification
- **Content:** Content for announcements
- **Display Position**
- **Customer Page:** The message will be displayed on the customer page.
- **Cart Page:** The message will be displayed on the cart page.
- **Display for Guest:** Allow to display notifications to guests

The screenshot shows the 'Edit Rule' page for a rule named 'test1'. The left sidebar contains navigation menus for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Partners & Extensions. The main content area is titled 'Edit Rule 'test1'' and includes a search bar and user profile 'khanh'. Below the title are buttons for 'Back', 'Delete Rule', 'Reset', 'Save and Continue Edit', and 'Save Rule'. The 'MAGENEST REWARD POINTS CONFIGURATION' section is active, with 'Notification Settings' selected. The 'Notification Settings' form includes:

- Notification Status: Active (dropdown)
- Content: Test (text input)
- Display Position: Cart Page (dropdown)
- Display for Guest: Yes (dropdown)

 The footer shows 'Copyright © 2021 Magento Commerce Inc. All rights reserved.' and 'Magento ver. 2.3.3' with links for 'Privacy Policy' and 'Report an Issue'.

For the Behavior Rule, you should set only one corresponding rule with the rule type instead of multiple rules with the same behavior condition. Or else they might conflict with each other.

General Information

Name * Platinum Member

Code * platinum

+ In **Customer in Group** settings, there is a grid table that displays customer list in-store. You can set the membership tier by selecting the customers on the list, then **Save Group** or **Save and Continue Edit**.

- o You can track the current status of each customer in the **Current Membership Group** column.
- o If you want to update the Membership Group/change customer's membership group, go to the Membership group you want to update, select the customer, then Save Group.
- o For example: To change customer "Veronica" from Silver Membership Group to Gold Membership Group, go to Gold Membership Group, select Veronica, then Save Group.

The screenshot shows the 'New Membership Group' page. On the left is a sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Stores, and System. The main content area has a breadcrumb 'MEMBERSHIP GROUP' and a sub-section 'Customer In Group'. Below this is a search bar and a table with 10 records. The table has columns for Id, Firstname, Lastname, Email, Current Membership Group, and Added At. Two records (Id 58 and 59) are selected with checkboxes.

Id	Firstname	Lastname	Email	Current Membership Group	Added At
1	Veronica	Costello	roni_cost@example.com	Silver Member	
2	thang	nguyen quang	nguyenquangthang1997@gmail.com	Silver Member	
3	qwq	qwqw	thang@gmail.com	Gold	
53	Sam	Ng	clone123@gmail.com	Gold	
58	David	LIU	sentol@hotmail.com		
59	tyu	juki	tuyen@gmail.com		
60	Bùi	Tuyền	buituyen2207@gmail.com		
61	Rontest	test2	enterprise.eco@gmail.com		
62	Tuong	Dinh	madn3s796@gmail.com		
63	tuyen	tuyen	tuyen11@gmail.com		

+ In each reward point rule, there is a point set for each membership group.

The screenshot shows the 'Edit Rule 'Comment Product'' page. The sidebar is the same as in the previous screenshot. The main content area has a breadcrumb 'MAGENEST REWARD POINTS CONFIGURATION' and a sub-section 'Actions'. Below this is a form to 'Set appropriate point action'. It includes a dropdown for 'Apply' (set to 'Give X points to customer'), a text input for 'Default number of points (X)' (set to 10), and a table for 'Membership Group' with columns for Group id, Group Name, and Point.

Group id	Group Name	Point
1	Silver Member	10
2	Gold	20
3	Platinum Member	30

Update

- When a new update is available, we will provide you with a new package containing our updated extension.
- You will have to delete the module directory and repeat the installation steps above.
- Flush the config cache. Your store and newly installed module should be working as expected.

Support

- We will reply to support requests within **2 business days**.
 - We will offer a **lifetime free update and 6 months of free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
 - Support **DOES NOT** include other series such as customizing our products, installation and uninstallation service.
-

Once again, thank you for purchasing our extension. If you have any questions relating to this extension, please do not hesitate to contact us for support.
