Introduction to Magento Event Tickets Extension

Event Tickets by Magenest is the ultimate extension for e-commerce websites that allows store admins to manage events and tickets. Store admin can also create custom ticket such as VIP, regular, adults only,... each with custom template to best fit the event's context. The extension can also send reminder so that your customer won't miss out the event.

Features

The extension is packed with the following features:

- Admin can create and edit the properties of events such as location, start time, end time, reminder,...
- Admin can add a new ticket type such as VIP, regular, adult only,... each with its own template and quantity.
- The module will automatically send a PDF-formatted ticket as an attachment via email after the customer is done purchasing the ticket.
- The module will send an email to remind customers of the upcoming event.
- Admin can have his own design for a template.
- Admin can toggle redemption status for each sent tickets.
- Users can also view and print tickets from their My account page
- The extension allows to display available event addresses in a nice map like Google Map

System Requirements

Your store should be running on Magento Community Edition version 1.8.x or 1.9.x.

Video Tutorial Playlist

(Go to the playlist link to view more: <https://www.youtube.com/playlist?list=PL0gckfH7zIZsQ8A5-rdWwVf0XksKdgtgd>)

Installation

Turn off Compilation mode

- If compilation mode in your Magento is enabled in your Magento store, you have to turn it off, otherwise your store and admin site would be inaccessible after installing the extension.
- To disable Magento Compilation, go to **System→Tools→Compilation**.

- Make sure you have backed up your Magento files and databases in case things go wrong.

Turn on cache

- You have to turn on your configuration cache to prevent early installation, as it could be a reason of errors.
- Go to **SystemCache Management**.

Flush Magento Cache Flush Cache Storage

Actions Refresh Submit

Perform the Installation

- After purchasing and download the module's zip file, unzip it into a directory of your choice.
- We recommend using FileZilla to perform the installation via FTP. Enter your store's Host IP, Username and Password, then hit **Quickconnect**

Host: 198.57.175.36 Username: magentode Password: Port: Quickconnect

Response: 227 Entering Passive Mode (198,57,175,36,140,109)
Command: MLSD
Response: 150 Accepted data connection
Response: 226-Options: -a -l
Response: 226 3 matches total
Status: Directory listing successful

- Carefully upload the files of the module to the corresponding directory

Post-installation

- You should refresh Magento's cache to provide Magento with the ability to register a new extension.
- To prevent an "Access Denied" error, you have to re-enter to the backend. Log in with a full administrator account to get the new permissions.
- Now you should check whether your website and your new module works as expected.

Configuration

Creating an event

- To create an event, first create a product. After that, navigate to **Catalog Manage Products**.
- Then add switch to **Event Booking** Tab

Recurring Profile	Enable Ticket
Design	Start time
Gift Options	End time
Inventory	Reminder before days
Categories	Reminder message template
Related Products	email
Up-sells	Generate PDF ticket
Cross-sells	Event location
Product Reviews	
Product Tags	
Customers Tagged Product	
Custom Options	
Game license delivery	
Event Booking	
	Event Ticket

- You can see a handful of options here, but first, select **Enable Ticket** as Yes

Attendees

Event Booking

Enable Ticket: Yes

Start time: 10/31/2015 8:47 SA

End time: 10/31/2015 12:47 CH

Reminder before days: 10/29/2015 12:01 SA

Reminder message template email: Default Template from Locale

Generate PDF ticket: Yes

Event location: Dong Da, Ha Noi

Then you can specify the following options:

- **Start time** and **End time**: starting and ending time for your event
- **Reminder before days**: the exact time for the module to send a reminder email to customer
- **Generate PDF Ticket**: Select Yes if you want your ticket to be a PDF document
- **Event Location**: Location for the event

Next up, specify some ticket types for the event, in the following demo, we specified a **Child**, **Adult** and **Student** ticket type

Event Ticket

Title *: Ticket Type

Input Type *: Radio Buttons

Title *	Price	Price Type	SKU	Qty	Code Prefix	Confirmation email	Sort Order	
Child (6 to 12 yea	0	Fixed		100		Default Template from Locale	1	
Adult	80	Fixed		150		Default Template from Locale	2	
Student	100	Fixed		300		Default Template from Locale	3	

Add

- **Title**: tick type's name
- **Qty**: the initial quantity for each ticket type
- **Code Prefix**: each ticket type comes with a specific code set, this is the code set's prefix
- **Confirmation email**: template for the ticket type
- Click on **Add** if you want to add a new type.

Hit **Save** when done, you can check to see if the event has been created by navigating to **Catalog Event Ticket Manage Event Products**

Dashboard Sales **Catalog** Customers Promotions Newsletter CMS Reports System Pin management

- On customer's side, he can check the mail for delivered ticket. By default, the template for delivered ticket is as follows:

- The code for the event is printed on the ticket. The customer also can use a barcode or QR scanning app on a smartphone to scan for the code.

Update

- When a bug fix or new feature is released, we will provide you with the module's new package. All you need to do is repeating the above installing steps and uploading the package onto your store. The code will automatically override.
- Flush the config cache. Your store and newly installed module should be working as expected.

Support

- We will reply to support requests after **2 business days**.
- We will offer **lifetime free update and 6 months free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
- Support **DOES NOT** include other series such as customizing our products, installation and uninstallation service.

Once again, thank you for purchasing our extension. If you have any questions relating to this extension, please do not hesitate to contact us for support.
