Introduction

Magento 2 Social Login is an extension developed by Magenest to help customers log in to Magento 2 stores conveniently with their social accounts.

Features For Admins

- Set up app for each social network including Twitter, Facebook, Amazon, LinkedIn, Pinterest, Reddit, LINE
- Add login popup with social login options
- Add social login options to sign in, sign up page
- Set social login suggestions for the customer at checkout page for customers who used to login with a social account on the store
- Add comment section using a Facebook account for customers on the product detail page
- Add social sharing buttons on the product page
- Monitor social login and manage social account
- Social login widget type

Features For Customers

- Choose to log in with one of 10 social accounts: Twitter, Facebook, Amazon, LinkedIn, Pinterest, Reddit, LINE, Apple ID
- Customer's store account can be linked with multiple social accounts
- Share products on their social networks
- Use the Facebook account to comment on the Magento 2 store
- Be suggested with social login at the checkout page if they used to login with a social account on the store

System Requirements

Your store should be running on **Magento 2 Community Edition version 2.2.x., 2.3.x, 2.4.x**

Configuration

General Configuration

First, navigate to **Stores > Configuration > Magenest > Social Login**, you will be able to enable:

- The login popup when the customer clicks on the **Sign In** button on the top menu bar
- **Display On:** Select area use social login
 - The social login options in Sign Up/Create an account page
 - The social login on the checkout page, including the **Sign In** button on the top of the page, and the social login suggestion for customers who used to login with social accounts on the store
 - The ability to comment on the product page using a Facebook account
- The ability to **share** the product link via social networks that are chosen in the social sharing options: Twitter, Facebook, LinkedIn, Pinterest, Reddit

Credentials Settings

+ On the same page, scroll down to see the Credentials setting section.

➕ In order to connect the social app to your Magento 2 store, you have to set up the app as follows

Apple ID

➕ How to set Apple Team ID, Client ID, Key Id, and File Key of Apple

To configure the extension, it is required to have an Apple Developer account. If you don't have it, please go to the [Apple Developer](#) page to create one.

Note that account creation and its approval might take time.

- **Enable:** Choose Yes to enable the Apple ID to log in feature
- Enter the **Apple Team ID, Client ID, Key ID** that were previously generated at the Apple Developer account.

★ [Apple configuration guide](#)

- Please keep in mind that you can download the Key file **ONLY ONCE**. Make sure you saved the file in a secured place so that you can get back to it later if necessary.
- Lastly, check the key information to find your Key ID which you'll need to configure the extension in the Magento 2 backend.
- After a successful **Key ID** verification, the file will no longer be stored at your Magento server. This is to prevent creating excessive files on a server.
- Please take into consideration that all Apple Developer credentials that you have created will be valid for 6 months, as designed by Apple guidelines. Please timely update all necessary API credentials to guarantee proper add-on functioning.

- Fusion Backpack**: 3 Reviews, \$59.00.
- Push It Messenger Bag**: 3 Reviews, \$45.00.
- Lifelong Fitness IV**: \$14.00. A DVD cover for a fitness program.

At the bottom of the page, a 'Social Login' widget is highlighted with a red box. It contains icons for Facebook, Google+, YouTube, Twitter, LinkedIn, YouTube, Messenger, and Apple. To the right of the social login icons is an email subscription form with the text 'Enter your email address' and a 'Subscribe' button. Below the social login widget, the footer text reads: 'Copyright © 2013-present Magento, Inc. All rights reserved.'

★ After user login, this widget will be hidden.

Update

- When a new update is available, we will provide you with a new package containing our updated extension.
- You will have to delete the module directory and repeat the installation steps above.
- Flush the config cache. Your store and newly installed module should be working as expected.

Support

- We will reply to support requests within **2 business days**.
- We will offer a **lifetime free update and 6 months of free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
- Support **DOES NOT** include other services such as customizing our products, installation, and uninstallation service.

Once again, thank you for purchasing our extension. If you have any questions relating to this extension, please do not hesitate to contact us for support.
