Introduction

Magento 2 Follow Up Emails extension for Magento 2 is a powerful extension which allows you to keep a healthy interaction with your customers. You will be able to create flexible rules for both follow-up emails and SMS to send them to your customers. This plays an important role to create successful and effective marketing campaigns. Thus, it will help to improve and boost sales for your business as well as getting closer to your customers.

How to create an email and SMS to send customers?

At Magento 2 back end, we created many available events such as Abandoned Cart, Customer Birthday, Customer Registration, Order Is Placed, Order Obtained Status Pending Payment and more in Ultimate Follow Up Email extension. You only choose events that they want to create and set them by entering some fields such as the content email, the content SMS, time to send emails/SMS and so on. Then, they will automatically send to customers. This is really useful and convenient for the business because the owner store can easily control contents sent and choose the best time to send your email marketing campaigns.

Especially, for the most common events are Abandoned Cart and Customer Birthday, we will provide great features in this extension.

How to send a follow-up email and SMS?

Do you wonder how to send an automatic follow up email/SMS to customers?

It is very simple. When customers interact with the events created, the system will automatically send follow up email or SMS to customers.

Email

One of the problems that most of the stores are facing now is emails sent automatically from their system to customers sometimes be recognized as spam and customers almost forget about them. It is definitely a regret, which affects considerably to your business situation. However, you do not need to worry, we have examined this problem and find out a solution. By allowing connection with [Mail Chimp](#), it will limit the risk that mails being recognized as spam to a minimum. And this will result in the higher possibility that your automatic emails will be sent directly to the customer's inbox and got more concern from them.

SMS

If you think these above features are amazingly wonderful, you will truly be impressed by a fact that this system allows you to send direct SMS to your customers by integrating with [Nexmo](#). The system will allow you to send SMS to customers after they place an order, register an account or subscribe newsletter.

What is [Nexmo](#)?

Nexmo offers a global SMS API which allows you to send messages to all but four countries and receive inbound messages via virtual numbers in twenty eight countries. It helps your business:

+ More security, lower latency.

+ Better delivery rates.

+ Free inbound SMS.

Nowadays, most people have owned at least a smartphone. It's definitely amazing when your messages can be sent directly to the customer's phone. And we say for sure that Ultimate Follow Up Emails is all you need, and indeed it's really more than you desire.

The following is all of things you need to use our Ultimate Follow UP Email and SMS Extension.

Feature list

- Allow admin to create different rules for sending emails.
 - Allow customers to choose from predefined email rules.
 - Set multiple email templates for each rule.
 - Set emailing schedule.
 - Add coupon code to emails.
 - View abandoned cart rate.
 - Smart abandoned cart.
 - View history of sent emails (mail log).
 - Fully flexible rules and conditions.
 - Allow admin to attach files into the email.
 - Allow admin to manage abandoned cart list.
 - Allow admin to search customer birthday list.
 - Make sure that the email will not be considered as spam with Mailchimp Mandrill integration.
 - Allow admin to configure whether the mobile field is visible and/or mandatory in customer registration form.
 - Integrate Magento 2 stores with Nexmo to send SMS to the customer's cell phone.
 - Create contents and schedules to send SMS to customers for each event.
 - Allow admin to send or cancel SMS manually.
-

System Requirements

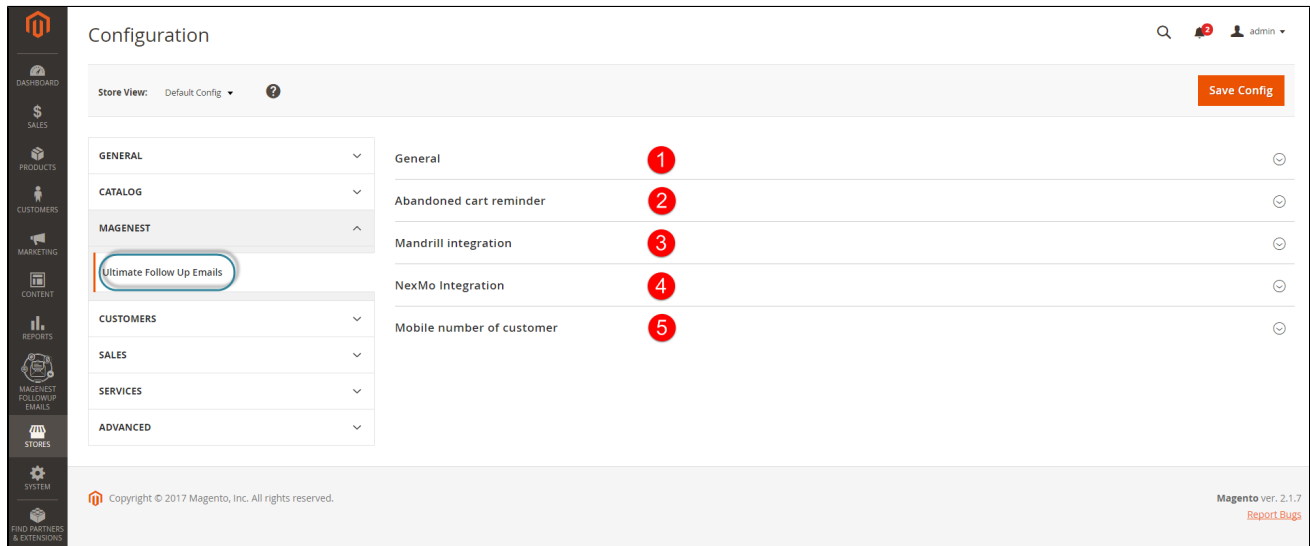

Your store should be running on Magento Edition version **2.x.x**.

Configuration

General Configuration

+ On the Admin sidebar, tap **Follow Up Emails And SMS**, then choose **Configuration**.

General

+ Set the following fields:

- **Email Sender:** choose the default sender for the reminder email.
- **BBC name:** Enter the name of the blind carbon copied receiver.
- **BBC email:** Enter the email address of blind carbon copied receiver.

Abandoned cart reminder

+ **Enable Abandoned Cart:** choose **Yes** to enable the abandoned cart feature.

+ **Time to be considered as abandoned cart:** set the time to trigger the cart as "abandoned" after being left on the store. The unit is minute(s) and the default time is 60 minutes if you leave the field blank.

Customer No Activities Reminder

+ **Time to be considered as having no activity:** set the time after that the customer is considered not having any activity after leaving the store. The default unit in this field is **Hour**. If this field is left blank, the default value will be set as 24 hours.

Mandrill Integration

This setting section allows sending massive email (up to 1000 emails).

- **Enable:** Choose **Yes** to enable Mandrill Integration.
- **API key:** Enter the API key for Mandrill Integration.
- After the API Key is entered, the account information will be displayed below.

Save Config

Mandrill integration

Integration with Mandrill to send email

Sample Email

- + The following is an abandoned cart email that they received when customers added items into their cart but they did not check out.
- + All of things in this email such as the email content, attached files are set when admin created the abandoned cart rule at back end.

Integration with Nexmo to send SMS

- + This is a great feature that we bring for you in this extension. Besides sending emails, you can directly send SMS to customers' mobile.
- + When a customer creates a new account, they will be required to enter their mobile if the owner store wants to use this feature.
- ⚠ **Note:** the customer needs to enter their exact phone because the system will send an SMS to this phone.

The screenshot shows a registration form with the following sections:

- Personal Information**
 - First Name *
 - Last Name *
 - Email *
 - ☐ Sign Up for Newsletter
- Sign-in Information**
 - Password *
 - Confirm Password *
- Additional Information**
 - Mobile *

At the bottom is a blue button labeled "Create an Account".

Two annotations with red arrows point to the "Mobile" field:

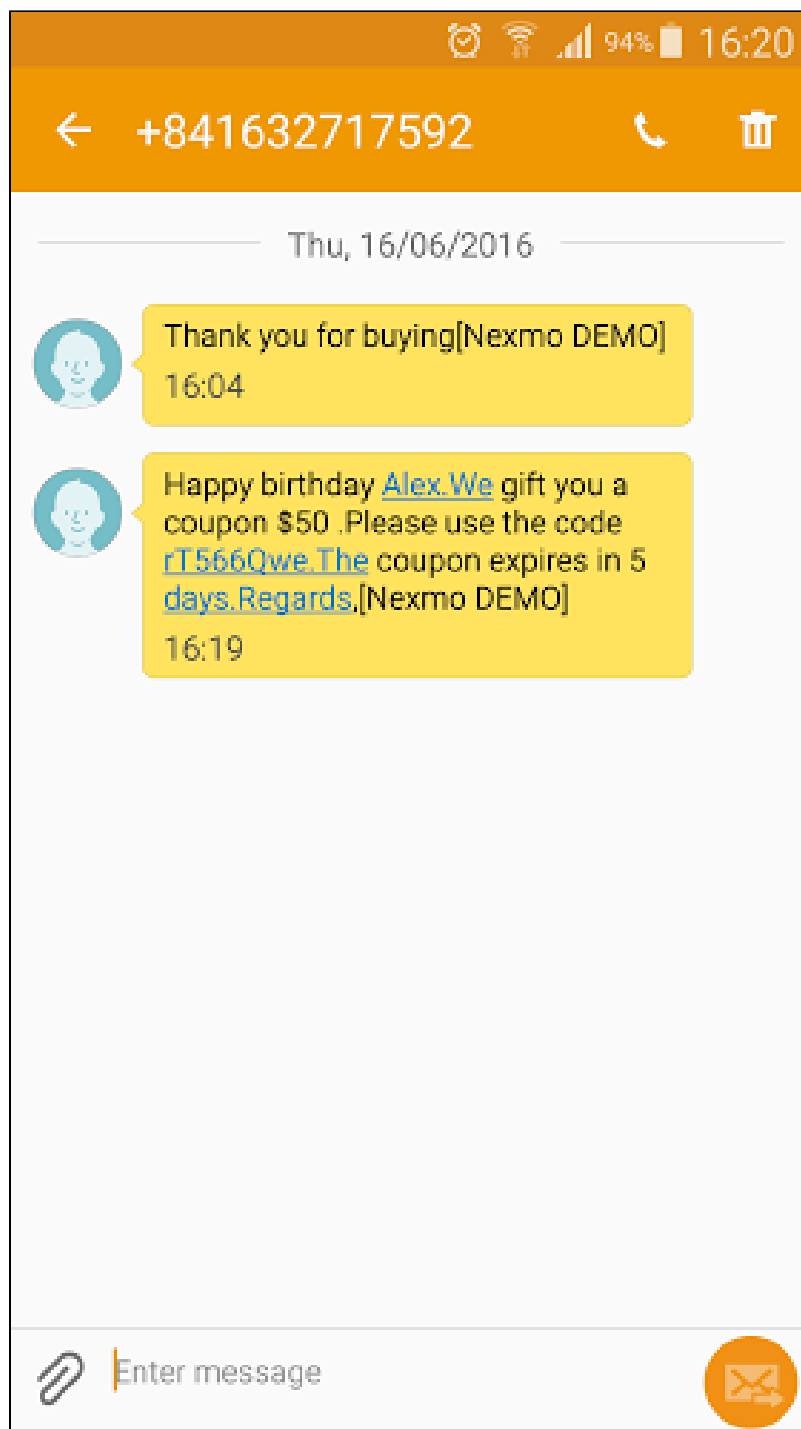

- Make mobile is required field**: Points to the "Mobile" field. Next to it is a dropdown menu with "Yes" selected. Below it, text reads: "If you choose yes the mobile input is required field".
- Allow mobile field input in customer register form**: Points to the "Mobile" field. Next to it is a dropdown menu with "Yes" selected. Below it, text reads: "If you choose yes, there is a mobile input field in customer's registration form".

Sample SMS

The following is an SMS which is sent to the customer.

As you can see the screen that we captured here. It is no doubt that customers will feel very happy when they received meaningful wishes on their birthday.

This is a really useful and fantastic tool to get closer to your customers.

Update

- When a bug fix or new feature is released, we will provide you with the module's new package.
 - All you need to do is repeating the above installing steps and uploading the package onto your store. The code will automatically override.
 - Flush the config cache. Your store and newly installed module should be working as expected.
-

Support

- We will reply to support requests within **2 business days**.
 - We will offer **lifetime free update and 6 months free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
 - Support **DOES NOT** include other series such as customizing our products, installation and uninstallation service.
-

Once again, thank you for purchasing our extension. If you have any questions relating to this extension, please do not hesitate to contact us for support.
