Introduction

SMS Marketing extension for Magento 2 is a powerful tool which allows store owners to send personalized SMS messages to customers on various occasion of the customer journey, including when they register a new account, when they order a product, when the status of the product changes, etc.

Features

- Customize SMS template according to the store owner's wish.
- Send SMS text messages to customers when they register.
- Send SMS text messages to customers when orders are created.
- Send SMS text messages to customers when orders are canceled.
- Send SMS text messages to customers when orders are refunded.

System Requirements

Your store should be running on Magento 2 Community Edition version 2.1.

How does it work

In order to start using the SMS Marketing extension, you need to do some configuration by going to **Stores > SMS Marketing**.

There are three sections that admins need to consider:

- + Mobile Login Option.
- + Setting Content SMS.
- + Integration Setting.

▪ Mobile Login Option

Expand the **Mobile Login Option** section. Then, there are two following fields showed:

+ The **Enable Mobile Login Option** filed: Allow admins to set whether this field is able to show on Create an Account page when customers register a new account or not.

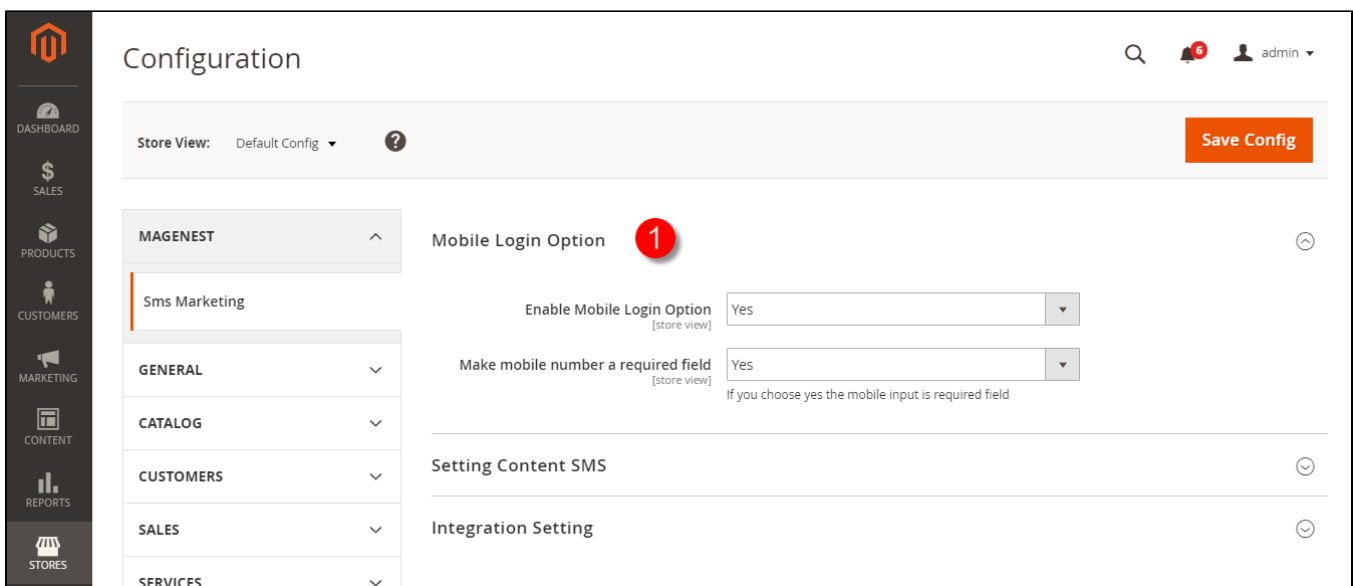

+ **Yes:** This field will be shown.

+ **No:** This field will be hidden.

+ The **Make mobile number a required field**: Allows admins to set whether the mobile field is a required field on Create an Account page when customers register or not.

+ **Yes:** The mobile field is a required field.

+ **No:** The mobile field is not a required field.

▪ Setting Content SMS

Expand the **Setting Content SMS** section, there are three following fields showed:

+ The **Enable Customer Register** field: Allows merchants to set whether they want to send a text message to customers' cell phone when customers create a new account on their site or not.

- Yes: Customers will receive a text message as soon as they register a new account on the site.

Also, the **Customer Register** field will be shown allowing store owners to set content of the message.

★ Note that the extension supports two following variables which are available to use in the SMS:

```
{{customer_name}}, {{customer_email}}
```

- No: Customers will not receive any messages when they register a new account on the site.

+ The **Enable Order Success** field: Allows merchants to set whether customers can be able to receive a text message when their order status is complete.

- Yes: Customers will receive a text message when their order status is complete.

Also, the **Order Success** field will be shown allowing store owners to set content of the message.

★ Note that the extension supports three following variables which are available to use in the SMS:

```
{customer_name}}, {{order_id}}, {{order_base_grand_totals}}
```

- No: Customers will not receive a text message when their order status is complete.

+ The **Enable Order Update** field: Allow merchants to set whether customers can be able to receive a text message when their order status changed.

- Yes: Customers will receive a text message when their order status is changed.

Also, the **Order Update** field will be shown allowing store owners to set content of the message.

★ Note that the extension supports three following variables which are available to use in the SMS:

```
{{customer_name}}, {{order_id}}, {{old_status}},{{new_status}}
```

- No: Customers will not receive a text message when their order status is changed.

The screenshot shows the MAGENEST admin interface. The sidebar on the left contains navigation links: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area is titled 'Mobile Login Option' and 'Setting Content SMS'. The 'Setting Content SMS' section is highlighted with a red circle and the number '2'. It contains three fields: 'Enable Customer Register', 'Customer Register', 'Enable Order Success', 'Order Success', 'Enable Order Update', and 'Order Update'. Each field has a dropdown menu for 'Yes' or 'No' and a text area for the message content. The 'Customer Register' field is highlighted with a red circle and the number '2'. The 'Order Update' field is highlighted with a blue border. Below each text area, there are 'Available variables that you can use in your SMS' listed.

■ Integration Settings

Expand the **Integration Settings** section, there are five subsections showed:

+ Text Local.

+ Nexmo.

+ Voodoo.

+ Text Marketer.

+ Twilio.

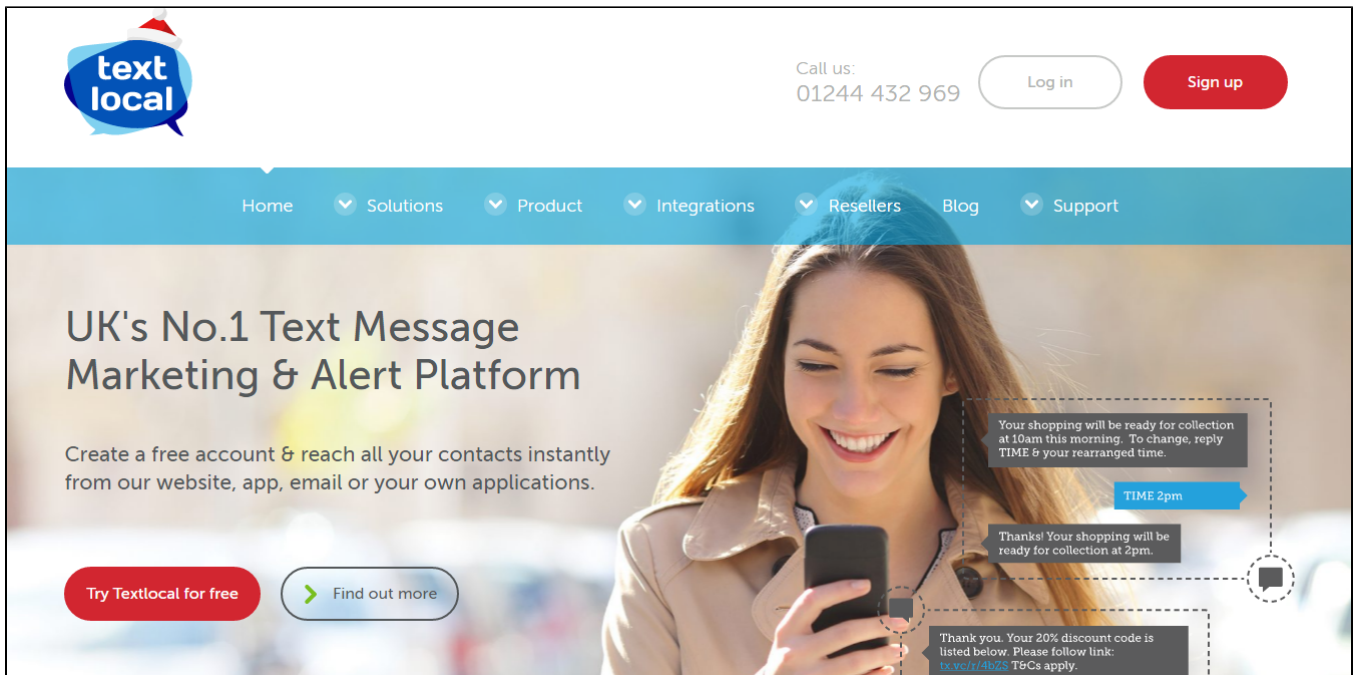

The screenshot shows the Magento Configuration page. On the left is a sidebar with navigation links: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area is titled 'Configuration' and has a 'Save Config' button in the top right. Below the title is a list of configuration sections: GENERAL, CATALOG, CUSTOMERS, SALES, SERVICES, and ADVANCED. The 'CUSTOMERS' section is selected, and its sub-section 'Integration Setting' is expanded, indicated by a red circle with the number '3'. The 'Integration Setting' section contains five subsections: Textlocal, Nexmo, Voodoo, Textmarketer, and Twilio, each with a dropdown arrow. At the bottom of the page, there is a copyright notice: 'Copyright © 2016 Magento Commerce Inc. All rights reserved.' and the version 'Magento ver. 2.1.0' with a 'Report Bugs' link.

+ Text Local

? How to get information from your Text Local account
