### Introduction

Groupon website is a daily deal based group buying website and has gained enormous popularity and tremendous response within a short period of time. The website offers huge discounts up to 50% to 90% on different products and services by presenting a new deal to the customers everyday. From haircuts to gadgets, there is nothing you can't find on Groupon. Groupon puts up discount offers consistently for fun, local activities and delicious restaurants that you may not have known existed prior to exploring them, allowing you new experiences on your budget. Moreover, the site is extremely easy to work as you can choose to specifically see the deals relevant to you and your area.

With Magenest's Group Deals extension for Magento 2, you can make your site with fully features of Groupon website.

#### Features For Admin

- Allow merchants to add many options for all groupon goods.
- Allow merchants to personalize your deals such as: name, location, price, countdown timer, ...
- Allow merchants to set up a coupon expiration period.
- Allow merchants to set up coupons quantity generated for each deal.
- Allow merchants to bind coupon to a certain product.
- Coupons auto-generation.
- Allow merchants to schedule deals to be run automatically.
- Allow merchants to specify maximum allowed purchases.
- Auto-count of the discount and "Save" price.
- Ability to change coupon code status manually.
- Allow your merchants to print coupons.

#### Features For Customers

- Allow customers to view all the groupon goods and their details.
- Customers can check all of their groupon deals and print the coupon for each of them.

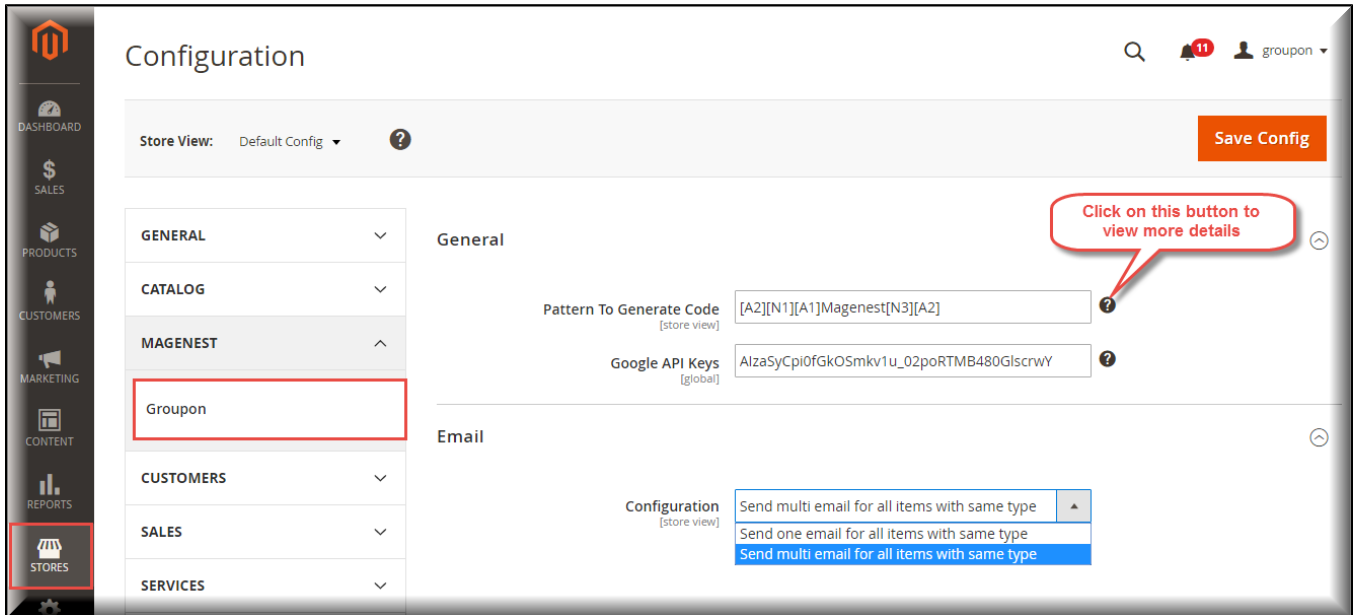

## System Requirements

Your store should be running on Magento 2 Community Edition version 2.1.x.

## Configuration

After installing the extension on the site, please make some settings for first use.

Go to **Stores > Configuration > Magenest > Groupon**, the Magenest's **Groupon** page will be shown as below.

**Configuration:** There are two options

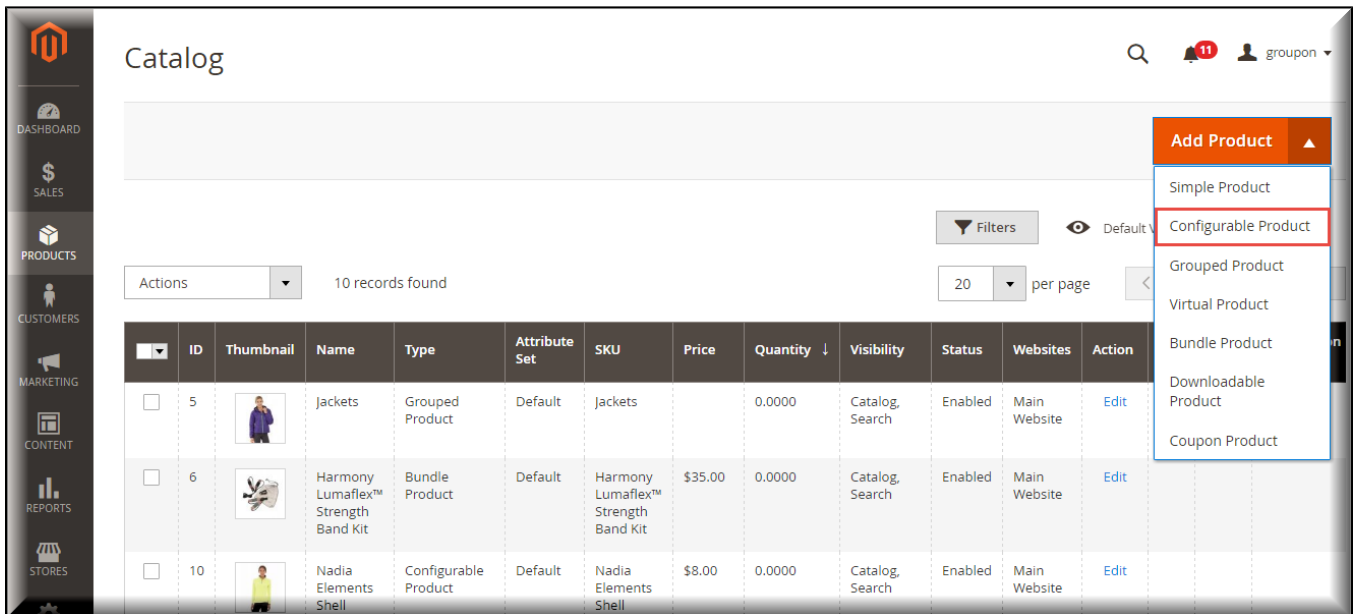

- + Send one email for all items with same type
- + Send multi email for all items with same type

## Main Functions

### For Subscription Product

- **Create a groupon product**

Each groupon product is an configurable product, so merchants need to go to **Products > Catalog > Configurable Product** when they want to create a new groupon product.

Go to the **Groupon** tab, there are two modes that admin can choose.

- **No:** Admin will create a normal Configurable Product.
- **Yes:** The product is now a Groupon Product. Admin now has to fill all the information such as **Priority**; **Start Date/Time**, **End Date/Time** ...

After filling all the needed information for your Groupon product, admin now can create a custom coupon ticket for this product in the **Build Ticket** section:

- First, choose image and set size for your ticket's background

Build Ticket

Background

Upload

Allowed file types: jpeg, gif, png.
