### Introduction

**Magento 2 Membership Program** developed by Magenest is a powerful tool which brings many benefits for both the owner store and customers.

On the one hand, it is true that membership program is extremely valuable for the business. Nowadays, many business such as health clubs or gym center use membership programs. They consider it as one of the important strategy business because membership programs actually bring a stable source of income and high profits for their business. On the other hand, those also give customers a variety of choices so that they can easily choose a suitable membership type. Therefore, they can save a significant money through the promotion policies given by the providers.

#### Features for admins

- Create and manage membership rules.
- Set rule name and discount condition for customers
- Create and manage membership plans.
- Manage member in the same membership plan.
- Manage membership purchase history.
- Set to upgrade price determined.

#### Features for customers

- Manage their membership.
- Membership upgrading an easy way.
- Providing friendly user interface.
- Save significant money when customers use the membership programs.

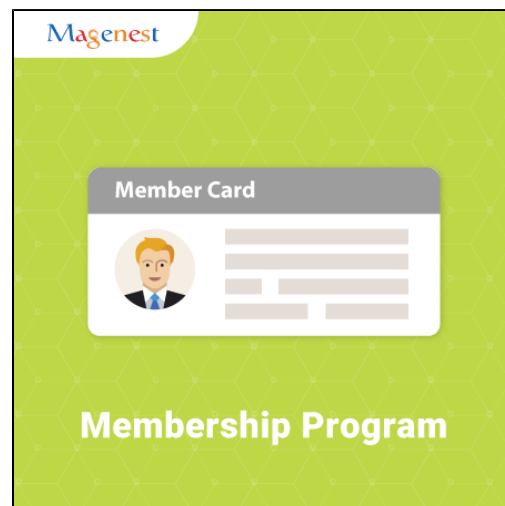

#### System Requirements

Your store should be running on Magento version 2.0.1 and more.

### Configuration

To set configuration, navigate to **Stores > Configuration > Magenest Membership**, consist of: **Plan Configuration**.

**Plan Update Options:**

At this tab, admin will set how to upgrade a membership when customers wish to improve their current membership. This option will calculate the remaining value of the current plan and subtract it from the price of the new plan.

**General**

Is Enabled: Enable or disable the membership extension

**Plan Upgrade Options**

Upgrade Price Determined:

**By rate subtraction (for limited plan)**

This option will calculate the remaining value of the current plan and subtract it from the price of the new plan.

For example, plan A last for 10 days and is priced at \$100, and plan A+ is priced at \$200. Mr. B been using plan A for 7 days and he upgrades his membership to plan A+. The remaining value from plan A is:

$$100 / 10 * 3 = \$30$$

The price for upgrading will be:

$$200 - 30 = \$170$$

**New plan price "minus" discount fixed amount (value1)**

The plan for upgrading will equal to the new plan price minus a specific value set by the manager.

**New plan price have discount percent (value1)**

Members get a specific discount amount on the new plan's original price. The percentage value is determined by the manager.

**By new plan price "minus" old plan price:**

The upgrading price equals to the new plan price minus the old plan price.
