### Introduction

With over 1 billion monthly active users and over 500 million daily active users, Instagram has become one of the most widely used social media in the world. This rapidly growing platform has proven its major role in the business competition. **Magenest** is now offering you a chance to benefit even more from your Instagram business account with our **Instagram Shop** extension. What's better for your sales than integrating all your Instagram photos on your store and attracting your customers to your products at first glance?

### Key Features

#### For Admin

- Easy to connect with the merchant's Instagram account with just one click.
- Fetch all photos or specific photos using hashtags from your Instagram to your Magento 2 store.
- Manage which photos will be shown in the Instagram slider/gallery and which not.
- Change the order/position of the photos displayed on the Instagram widget and gallery
- Add redirect links to pinned products in your Instagram photos (on Magento 2 store)
- Add a Call-to-Action button while hovering on photos.
- Customize your slider to suit your website layout
- Performance report

#### For Customer

- Have an interesting product display layout for a better shopping experience.
- Purchase the product easily by clicking directly on the photos.
- Get updated with the Store's latest Instagram posts.

### System Requirements

Your store should be running on **Magento 2 Community Edition** version **2.2.x, 2.3.x**

## Connect your Instagram account to your Magento store

★ **Requirements:** You need to have the following information

1. An **Instagram Business Account** or **Instagram Creator Account**. (Follow this instruction for more details [https://help.instagram.com/502981923235522?ref=fbb\\_igb\\_profile](https://help.instagram.com/502981923235522?ref=fbb_igb_profile))
2. A **Facebook page** account connected with the above account. (Follow this instruction for more details <https://help.instagram.com/356902681064399>)

## Tutorial video

+ Please follow the instruction video below:

★ In case you find this video hard to follow, please read our guide steps:

- In order to connect your store to Instagram, on the **Admin sidebar**, go to **Instagram Shop > Configuration**.
- Under the **Instagram** section, click on the **Get Page Access Token** button to connect Instagram with Magento, you will be redirected to an endpoint where the login dialog is shown and you can approve the permissions request here.

💡 **Step 1: Click on the Get Page Access Token button**

The screenshot shows the 'Configuration' page in the Magento Admin. On the left is a sidebar with a menu containing 'GENERAL', 'MAGENEST', 'Gift Registry Configuration', and 'Instagram Shop'. The 'Instagram Shop' option is selected and highlighted in red. The main content area is titled 'Configuration' and features a search icon, a notification bell with '3' alerts, and a user profile 'admin2'. Below the title bar, there's a 'Scope' dropdown set to 'Default Config' and a 'Save Config' button. The 'Instagram' section is active, displaying the Instagram logo and a 'Permanent Page Access Token' field with a masked token ending in '8NW'. A 'Get Page Access Token' button is prominently displayed. Below this button, a message states: 'You will now be redirected to Facebook to connect your Instagram to our integration app. Please only chose one page...'

💡 **Step 2: Approve the permissions for our application:**

- Click on the Edit Settings button.

## You've previously linked Integration to Facebook

💡 **Step 3:** Click on the **Get Instagram Info** button to pull the data from the Instagram account to Magento site.

## Configuration

In this section, you can set

- **Add Link to Gallery in frontend Main Menu:** Add the Instagram Gallery category in the top menu bar
- **Add Instagram Photos to Product View:** Display corresponding Instagram Photos in each product detail pages
- **Button Title:** The title of the button under the Instagram Slider
- **Button CSS:** Flexible to change the button style with CSS
- **Hover text:** The content of the Call-to-action button displayed when hovering over the Instagram image (in the Instagram slider)
- **Hashtag:** The hashtag linked with the Instagram hashtag, displayed in the Instagram block on the product detail page
- **Block title:** The title of the Instagram block on the product detail page
- **Block content:** The content of the Instagram block on product detail page

**+ Instagram Tags:** Fill in the hashtags of the Instagram photos you want to get from your Instagram to the Magento store.

Note that the hashtags must be separated by commas.

**+ Get Photos on your Instagram Account:** Click on the **Get Photos Now** button to get all photos of your Instagram account.

Remember to **save the configuration**.

## Back end Settings

### **+ Widget**

You can add the Instagram widget by going to **Instagram Shop > Widget > Add Widget**

## Widgets

### + Add product link to the photo

You can add product redirect links to each photo in Instagram Gallery, by going to **Product > Catalog > "Product" > Instagram photos**

Choose the photos with the product shown by clicking on **Add Photos to Product**, then choose the desired photos.

You can remove the link by click on Remove in the Actions column.

The photos added in this setting will be displayed in the Instagram widget on the product detail page if you enable the **Add Instagram Photos to Product View** in the configuration.

- **Gallery of your Instagram Photos**

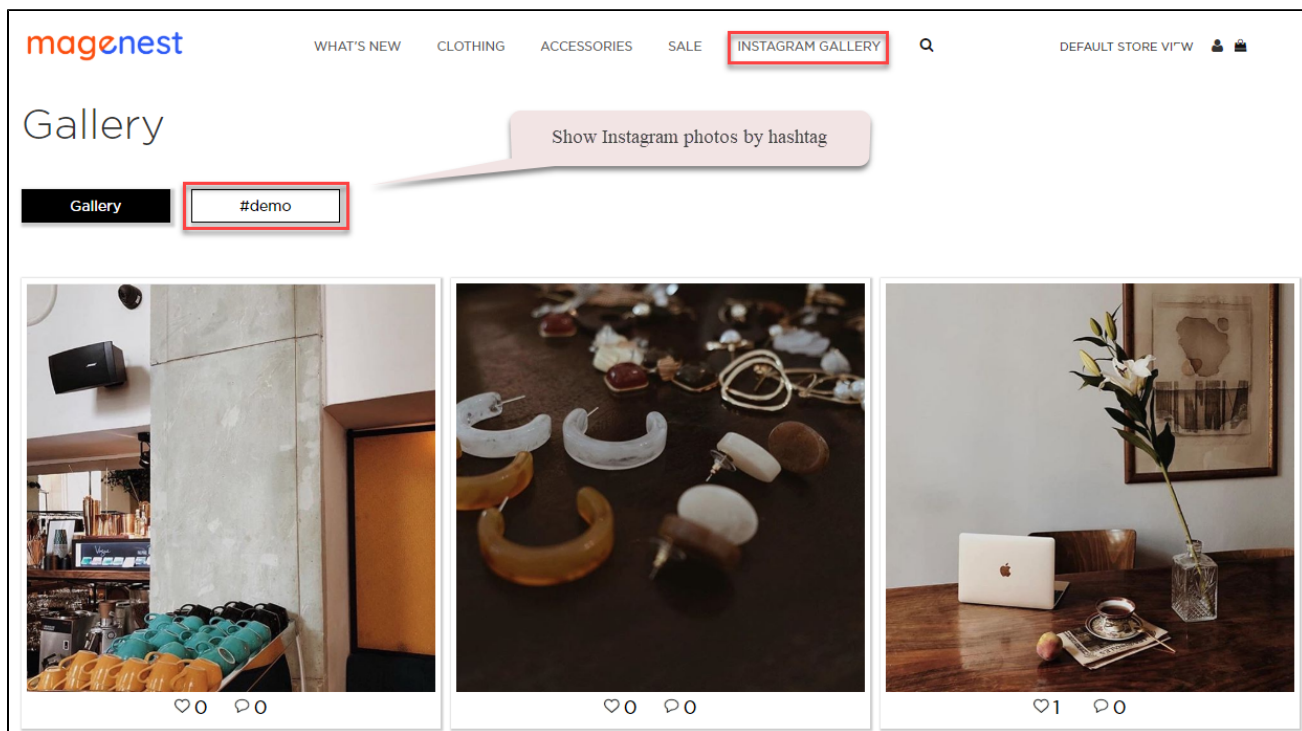

On the top menu bar, when you click on **Instagram Gallery**, it will display a gallery of all your Instagram photos.

When you hover on the photo, a caption window will slide from right to left and show the caption of the photo. Like(s) and comment(s) of the photos will be displayed under each one.

- **Gallery of Instagram photos by hashtags**

When you choose a hashtag, it will display photos with that hashtag (collected from your Instagram account).

## Update

- When a bug fix or new feature is released, we will provide you with the module's new package.
  - All you need to do is repeating the above installing steps and uploading the package onto your store. The code will automatically override.
  - Flush the configure cache. Your store and newly installed module should be working as expected.
- 

## Support

- We will reply to support requests within **2 business days**.
- We will offer a **lifetime free update and 6 months of free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
- Support **DOES NOT** include other series such as customizing our products, installation, and uninstallation service.
