Introducing to Woocommerce License manager

The Woocommerce License manager plugin is a alternative sale model , it is suitable if your online store sell game license, itunes card, phone card, serial codes, keys, PIN. The module will deliver license automatically after customers purchase product.

The workflow of module

Admin (shop manager) add licenses for product named Xbox live for example. He can use textbox to enter license code or he can upload license files.

Customer buy license product. He will receive email that attach licenses. He can view and download license in My Account pages.

My License

Order #	Product	License code	License file
10975	Age of emperor		Download
10975	Age of emperor		Download
10975	Age of emperor		Download
10975	Age of emperor		Download
10975	Age of emperor		Download
10975	Age of emperor		Download

Features

- Admin can add unlimited license for Simple product and Variable product.
 - Admin can edit, delete license in the product.
 - Admin can easily track sold out/in stock license on grid view.
 - Admin can export licenses (text license) to csv file.
-
- Customer received email with license information after purchase.
 - Customer can view the purchased license in my account page.
-
- Auto update "out of stock" status..
 - Licenses is encrypted in database.

Requirements

- Using **Woocommerce** plugin
- Your server have to install **Mcrypt** library for PHP

Installation

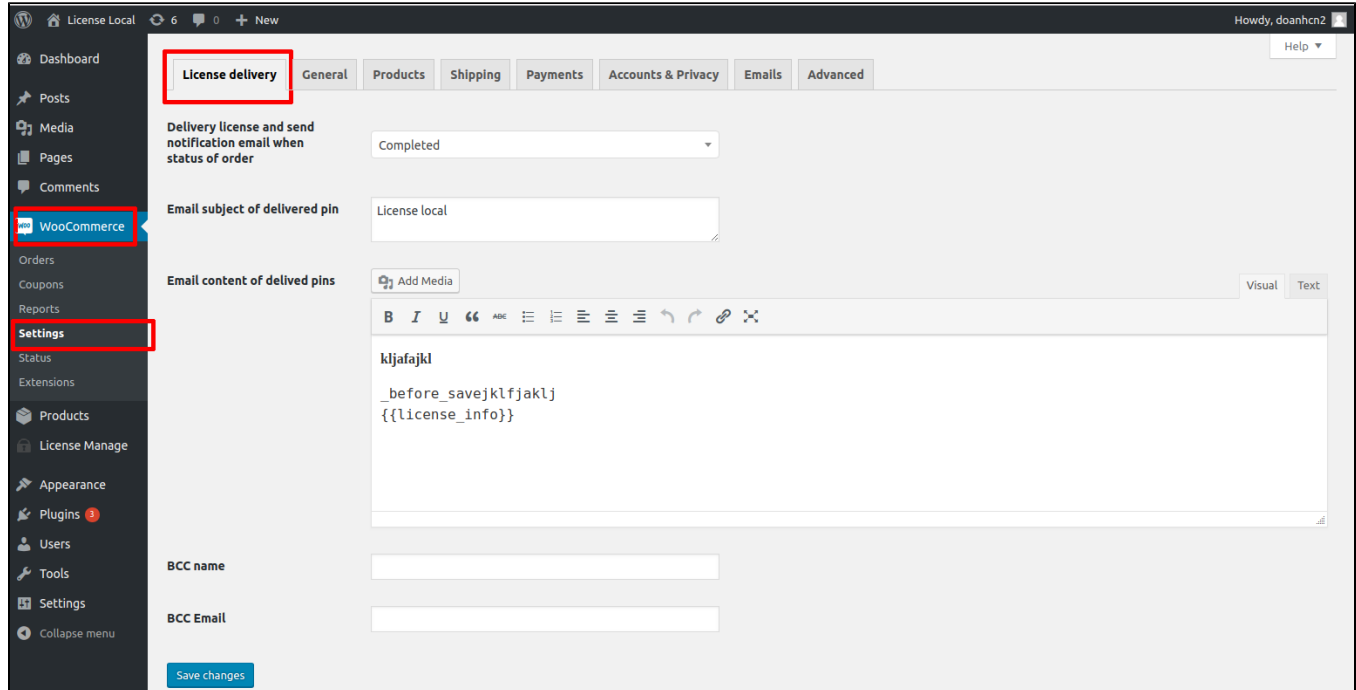

1. Upload the Woocommerce License manager to the folder Plugins through submenu "Add New".

Note: Please sure that the name of plugin folder at wp-content/plugins is "woocommerce-license-manage"

2. Activate the extension through the "Plugins" menu in WordPress

Configuration

After install License manager plugin, please follow these steps for configuration: In the admin panel, go to **WooCommerce > Settings > License Delivery**.

1. Delivery license and send notification email when status of order

The time of sending mail: when status of order is one of "On hold", "Complete", "Processing", "Pending". We recommend you choose complete for live website. If it is demo or test you can choose on hold option

2. Email subject of delivered pin

The subject of email sent to Customers.

3. Email content of delivered pins

This field is where you define the notification license email content.

The module automatically insert license code in email content and attach the license file in email. You can use some pre defined email variable in content of delivered pin

```
{{license_info}}, {{customer}}, {{store_url}}, {{store_name}}
```

4. BCC name/BCC email

The module will bcc all the notification emails for the email address you specify here

Don't forget click **Save changes** button!

How to change password of license key encryption

The screenshot shows the 'Change Password' interface of the License Local plugin. On the left is a sidebar menu with 'License Manage' and 'Password' highlighted with red boxes. The main area has the title 'Change Password' and the instruction 'Change password encrypt pin number.' It contains three input fields: 'Old Password', 'New Password', and 'Repeat Password'. Below these is a 'Passwords Match' status and a 'Change Password Encrypt' button. Further down is a 'Password admin' input field and a 'Reset Password' button. A 'Notice!' section follows, stating: 'Please read the notice carefull. 1. Password is used to encrypt your pin number and show your pin number without encrypting. (Default password is "magenest")'.

Please note that only Admin have the permission to change the password of license key encryption.

- Default password: magenest
- Password is used to encrypt your pin number, show your pin number without encrypting and edit license.

You can reset encrypt password to "magenest" if you have Administrator's password

Create License Product

- Click on **Add New** product button.
- Select **License** and **Virtual** like the following screenshot.

The screenshot shows the 'Add New' product screen in WooCommerce. The 'Product data' dropdown is set to 'Simple product'. The 'License' and 'Virtual' checkboxes are checked and highlighted with red boxes. The 'Downloadable' checkbox is unchecked. The left sidebar shows 'Products' and 'License Manage' in the menu. The main content area has tabs for 'General', 'Inventory', 'Linked Products', 'Attributes', 'Advanced', and 'License config'. The 'License text' section has a 'File name' input and an 'Add License' button. The 'License Image URL' section has a URL input and a 'Choose File' button. The 'License File' section has a 'Choose File' button and a 'Delete' button. The 'Enable encrypt' checkbox is checked. An 'Import licenses' button is at the bottom.

- Add licenses in **License Config** section.
- With text license, enter license key of products in **License text**.
- In addition, you can upload file licenses key via image in **License Image URL**.
- If your license is a file, click on **Choose File** to choose .txt file in your computer (only accept .txt extension).
- Note: If you have more text license or file license, click on **Add License** button to add each line.
- If you want add license without encrypt, you can deselect Enable encrypt option. The Encrypt only support **Text license**

Notice: Click **Import licenses** button to save licenses in **License of product** before Publish product.

- After Import licenses, you can manage Licenses of product in License of Product box:
