Introduction

Banner Slider for Magento 2 lets merchants create and use sliders as banners on product listing pages. This allows you to promote your content and navigate traffic on your website.

Key featureblocked URL

For Admin

- Choose between three types of banners and sliders.
- Create sliders in Magento 2 backend.
- Upload photos to use as a slide.
- Add links to slides.
- Highly customizable appearance.
- Multiple slider animations.
- Receive the banner/slider click reports (NEW)
- Import banner template (NEW)

For Customer

- Quickly access the outstanding product on the shop page.

System requirement

Your store must be running on:

- **Magento Open Source 2.1.x, 2.2.x, 2.3.x, 2.4.x**
- **Magento Commerce 2.1.x, 2.2.x, 2.3.x, 2.4.x**

Configuration

 On the **Admin sidebar**, choose **Banner Slider > Manage Banner Slider**

+ On the **Slider Page**, the customer can manage the available slider or create a new one.

Style Configurations

Custom Css

Activate Windows
Go to Settings to activate Windows.

Add custom CSS to style your new banner

- Click on the **Edit** icon next to Banner, you'll see the **Style Configuration** box. You could add custom CSS there to style your new banner.

Add a New Banner with the configuration feature

If you do not have a CSS banner available, you could add it with the Banner Container configuration feature.

+ Customize the **Banner Container**

- Click on the **Edit** icon next to the **Banner Container**

- Image File:** Upload a new background image for the banner.

Please note that you can only upload the image with png, .jpeg, .jpg. format and a maximum size of 2MB

- Image (mobile) File:** Upload a new background image for Mobile Please note that you can only upload the image with png, .jpeg, .jpg. format with a maximum size of 2MB

Note: you can choose custom upload or Select from Gallery.

- Background Image Attribute**
 - Position:** Choose a position for the image
 - Repeat:** Choose if the image can be repeated to be fully displayed in the container when its size is smaller than the container
 - Size:** Choose how the image is displayed in the container (Cover, Contain or Auto)
 - Padding and Margin:** adjust the dimension of the banner according to your requirement. View the effects of your changes on the demo banner on the left side.
- Choose Category:** select one category on the drop-down list to get data for the banner.
- Banner/Slider URL:** You can fill in a URL under the http/https, ftp format to redirect users to an external link when they click on the banner.
- Opening Banner/Slider URL in a new tab:** Choose **Yes** to set when users click on Banner with URL, there will be a new tab
- Custom Class:** enter the name of the custom class which is defined on the Banner Configuration.

+ Customize the Banner Content

- Click on the **Edit** icon next to the **Banner Content**

The screenshot shows a 'BANNER' configuration window. On the left, there's a 'Banner Container' section with a 'Banner Content' item highlighted by a red box. Below it is a 'Content box: Please enter content of box' field. On the right, the 'BANNER SETTING' panel is open, showing 'Item Content Configurations'. The settings include: Animation (set to 'None'), Animation Delay (ms) (set to 0), Width (100%), Height (px), Background Color (black), Opacity (0), Padding (px) (Top: 15, Right: 15, Bottom: 15, Left: 15), and Margin (px) (Top: 0, Right: 0, Bottom: 0, Left: 0).

- Animation:** Choose banner content animation.

There is a wide range of options for you to select according to your needs

The screenshot shows the 'Animation' dropdown menu. The options are: None, Attention Seekers (bounce, flash, pulse, rubberBand, shake, swing, tada, wobble, jello, heartBeat), Bouncing Entrances (bounceIn, bounceInDown, bounceInLeft, bounceInRight, bounceInUp), and Bouncing Exits (bounceOut).

- Animation Delay:** Set the time (per second) to delay the banner content's effect.
- Width, Height:** Set size for the content of Banner
- Padding and Margin:** Adjust the dimension for the banner padding and margin to fit your requirement.

View the effects of your changes on the demo banner on the left side.

- Background Color, Opacity:** Choose the background color for the content of Banner

+ Custom the Content Box

If you click on the **Edit icon** in the **Content box**, you'll be able to configure the content.

- **Type:** You can select Button, Text, or HTML

If you select HTML you'll be able to edit the banner button according to the image below

The screenshot displays the 'BANNER SETTING' interface. On the left, a 'Banner Container' preview shows a placeholder text 'Content box. Please enter content of box'. Below the preview is an 'Add Content box' button. The right panel, titled 'Content Box Configurations', includes a 'Type' dropdown set to 'HTML', an 'Animation' dropdown set to 'None', and an 'Animation Delay (ms)' input set to '0'. Below these is an 'HTML' editor with a 'Show/Hide editor' toggle and a rich text editor toolbar. The editor contains the same placeholder text. At the bottom of the settings panel, there are fields for 'Box Content Size' (set to '100'), 'Position' (set to 'Left'), 'Padding (px)' (Top, Right, Bottom, Left, all set to '0'), 'Margin (px)' (Top, Right, Bottom, Left, all set to '0'), and 'Custom Class'.

★ Once you select **Button**, you'll be able to edit the banner button according to the image below

The screenshot displays the 'Banner Setting' interface with the 'Type' dropdown set to 'Button'. The 'Content Box Configurations' panel includes a 'Button URL' dropdown set to 'Custom Link', a 'Custom Link' input field, a 'Content Type' dropdown set to 'Custom Text', and a 'Content' input field containing the placeholder text. Below these are the same fields for 'Box Content Size', 'Position', 'Padding', and 'Margin' as in the previous image. Additionally, there are color pickers for 'Text Color' (set to orange), 'Text Color Hover' (set to white), 'Background Color' (set to white), 'Background Color Hover' (set to orange), 'Button Color' (set to orange), and 'Button Color Hover' (set to orange). A 'Custom Class' field is at the bottom.

★ Once you select the Text type, you'll be able to configure the banner text like the image below

Layout Updates

Add Layout Update

Create a Slider

+ Choose the type **Single Slider**. Under the quick preview box, click on the **Add New Slider Item** button to add the number of sliders that you expected.

+ Click on each Slider Item button on the left to configure for each slider.

+ On **Slider Configuration**:

- **Items/Slider**: choose the number of slider items that will appear at the same time in a slide.
- **Slider Animation**: Choose Slider animation
- **Animation Delay (s)**: Set the time (per second) to delay the slider's effect.

★ **Note**: Animation delay must be smaller than Auto Play Speed

- **Margin (Spacing between items):** set the distance between the slider items. The unit for space is Px.
- **Arrows:** display the switch button aside.
- **Dots:** display the dots on the slider footer when switching the sliders.
- **Auto Height:** synchronize the height of slider backgrounds with different sizes. The largest height will be set as the default height.
- **Loop**
- **Auto Play**
- **Draggable**
- **Center Mode**

+ Under Style Configuration

- **Custom Class:** Enter the name of the custom class that is defined in the below section.
- **Custom CSS:** define the custom CSS to style the slider.

+ On Item Configurations and Item Content Configurations, please refer to the instruction for this part of Banner Settings

The screenshot displays the 'SLIDER' configuration window. On the left, there's a preview area for 'Slider Item 1' with a red box highlighting the 'SLIDER' label. The main configuration panel on the right is titled 'SLIDER SETTING' and contains two sections: 'Slider Configurations' and 'Style Configurations'. The 'Slider Configurations' section includes fields for 'Items/Slider' (set to 1), 'Slider Animation' (set to 'None'), 'Animation Delay (ms)' (set to 0), 'Margin (Spacing between items)' (set to 0), and a list of toggle switches for 'Arrows', 'Dots', 'Auto Height', 'Loop', 'Auto Play', 'Auto Play Speed (ms)', 'Pause On Hover', 'Draggable', and 'Center Mode', all of which are currently turned on. The 'Style Configurations' section has fields for 'Custom Class' and 'Custom Css'.

Create 2 Sliders with Synchronized Transition

+ Choose the type 2 Sliders with Synchronized Transition. There will be 2 default sliders created. These sliders will be displayed on the front end at the same time and interact with each other.

+ On each slider configuration, click on the **Add New Slider Item button to create new slider items. Note that when a number of slider items created on one slider, an equal number of slider items will be generated automatically on the other slider.**

This screenshot shows the 'SLIDER' configuration window with two sliders, 'SLIDER 1' and 'SLIDER 2', visible at the top. The 'SLIDER 2' label is highlighted with a red box. The configuration panel on the right is identical to the previous one, showing the same settings for 'Slider Configurations' and 'Style Configurations'. The 'Items/Slider' field is still set to 1, and all the same toggle switches are turned on.

Note: There will be a number of slider items created automatically on one slider. This number equal to the number of slider items added on the other slider.

The item on one slider will be displayed at the same time as the item in the same order on the other slider. For example, slider item 2 in slider 1 will be displayed with slider item 2 in slider 2 at once.

Import Banner/Slider

+ On the Admin sidebar, choose **System > Data Transfer > Import**

[blocked URL](#)

+ On the Import page

- **Entity Type:** Choose Banner Slider import
- **Import Behavior:** Choose Type Import

[blocked URL](#)

+ You can download the sample file by clicking Download Sample File

[blocked URL](#)

+ Click **Choose File** to select the file to import.

Find the CSV file that you prepared to import and click Open.

After that, click **Check Data** button

Wait a few moments for the validation process to complete.

If the import data is valid, the following message appears:

[blocked URL](#)

If the file is valid, click Import.

The import process continues to the end of the data unless an error is encountered.

Report Clicks Banners/Sliders

+ On the Admin Sidebar, go to **Banner Slider > Reports Click Banners/Sliders**

The screenshot shows the Magento Admin interface. The left sidebar is expanded, and the 'Report Clicks Banners/Sliders' link is highlighted with a red box. The main content area displays a table with 10 records found. The table has columns for Name, Type, Status, and Action. The records include Template 1, Template 2, Template 9, Template 8, Slider 1, slider syncing 1, slider syncing 2, Template 3, Slider Syncing 3, and Slider Syncing 4. The Status column shows 'OFF' for templates and 'ON' for sliders and syncing items. The Action column has a 'Select' link for each record.

Name	Type	Status	Action
Template 1	Slider	OFF	Select
Template 2	Slider	OFF	Select
Template 9	Slider	OFF	Select
Template 8	Banner	ON	Select
Slider 1	Slider	ON	Select
slider syncing 1	Slider Syncing	ON	Select
slider syncing 2	Slider Syncing	ON	Select
Template 3	Banner	ON	Select
Slider Syncing 3	Slider Syncing	ON	Select
Slider Syncing 4	Slider Syncing	ON	Select

+ On the **Report** page, the admin can see the **Slider Name, Clicks total, and Click Date**.

One IP address can only be counted as one click.

⚠ Note: The report only includes the number of click on the linked sliders (without the number of click on the button)
