Introduction

Product reviews have always played a key role in an online store's branding and marketing. In this new decade of online shopping, regular reviews are no longer enough for a customer's product pre-evaluation and for a brand to convince their shoppers. In order to help the merchants reinforce their customer's trust and give them better product validation, Magenest has developed PhotoReview extension, a tool that allows customers to give visually attracted feedback to the products they purchased.

Highlight Features

For Admin

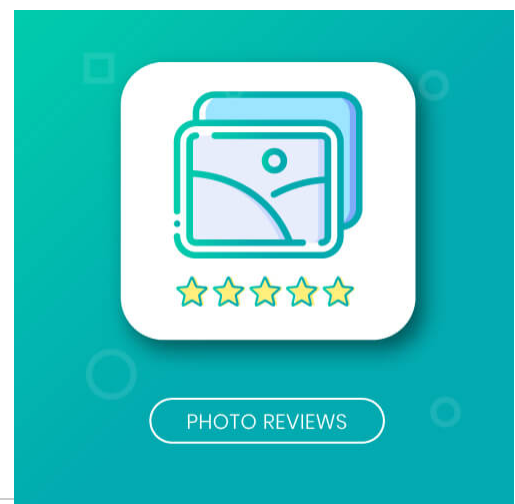

- Send emails to remind customers to review their purchased products.
- Add comments on customers' reviews
- Enable pros and cons sections to get more informative reviews from customers
- Display all photo reviews of the products on the Gallery page
- Check whether the reviewers have purchased the products or not
- Edit customers' reviews on the back-end.

For Customers

- Create product reviews with vibrant photos
- Describe the product's pros and cons in the review
- Add external links to the product reviews
- Share reviews via Facebook and Twitter
- View reviews photos in popups
- Filter reviews with photos only
- Receive coupons for writing product reviews

System Requirements

Your store should be running on **Magento 2 Community Edition version 2.2.x, 2.3.x** or **Magento 2 Enterprise Edition version 2.2.x, 2.3.x**.

Main Functions

For Admin

Reminder Email Logs

- + Go to **Photo Review** menu > **Reminder Email**
- + On the **Reminder Email Logs**

- Admin can see all the scheduled emails which will be sent to remind customers to write a product review.
- Admin can send reminder emails manually. To send an email manually, **Select** an email > **Action** drop-down > **Send Manually**
- Admin can preview reminder emails before sending to customers

The screenshot shows the Magento Admin interface. The sidebar on the left contains navigation menus: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, PHOTO REVIEW, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The top navigation bar includes a search icon, a notification bell, and a user profile dropdown. The main content area is titled 'Reminder Email Logs'. It features a 'Send Manual' button and a table with the following columns: ID, Order Id, Status, Created At, Sent At, Email, and Action. The table contains one record with ID 1, Order Id 8, Status Queue, Created At 2020-02-26 03:15:55, Sent At 2020-02-26 03:15:53, and Email ronl_cost@example.com. The Action column has a dropdown menu with 'Select' and 'Send Manually' options. The footer of the page includes the Magento logo, copyright information, and links to Privacy Policy and Report an Issue.

ID	Order Id	Status	Created At	Sent At	Email	Action
1	8	Queue	2020-02-26 03:15:55	2020-02-26 03:15:53	ronl_cost@example.com	Select

Review Reminder Email

Dear my !
We really hope you had a great experience with us.
To ensure you received the very best service from us, and continue to do so, we'd love to hear your feedback.

Push It Messenger Bag

[Get your review](#)

+ When the customers complete the purchase, after the chosen period of time, a reminder email will be sent to their mailbox to remind them to write a product review.

View and edit Review details

+ Admin can view and edit customer's reviews from the back-end. On the Admin sidebar, click on **Photo Review > Reviews > Edit** a review

+ On the **Edit Review** Page

 SHARE

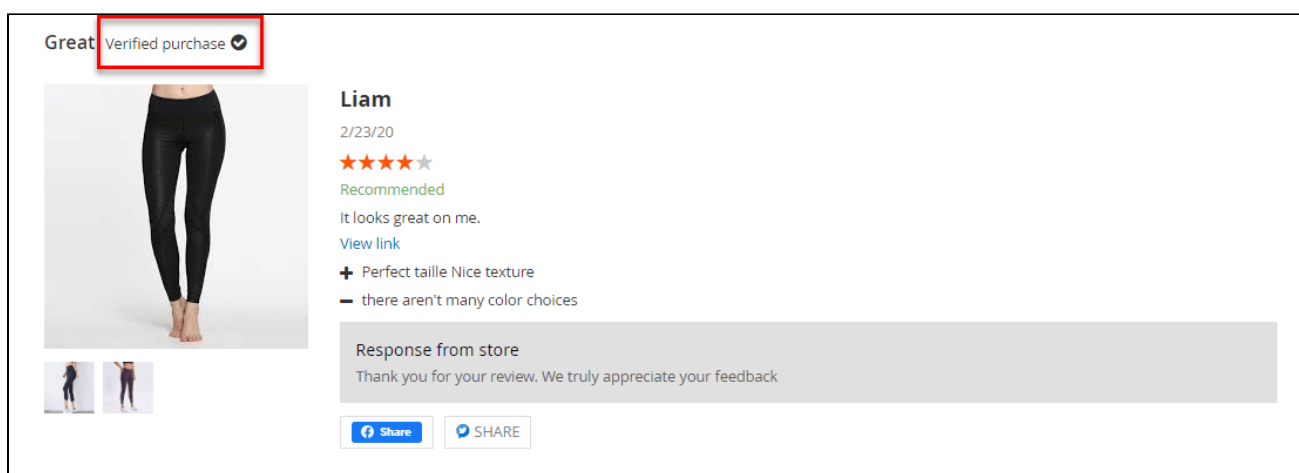

Customers can filter reviews with photos

Click here to filter

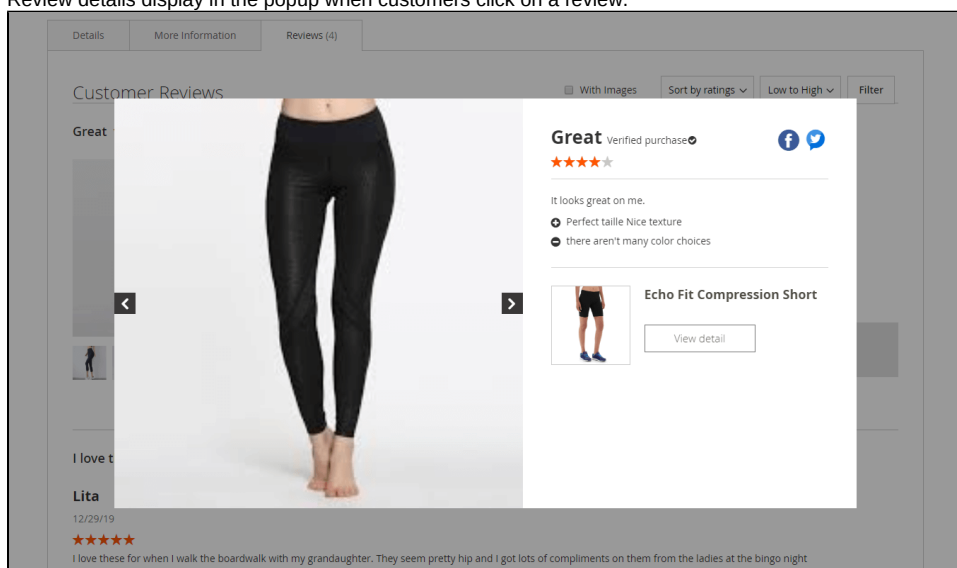

- Customers can share their reviews via Facebook and Twitter.

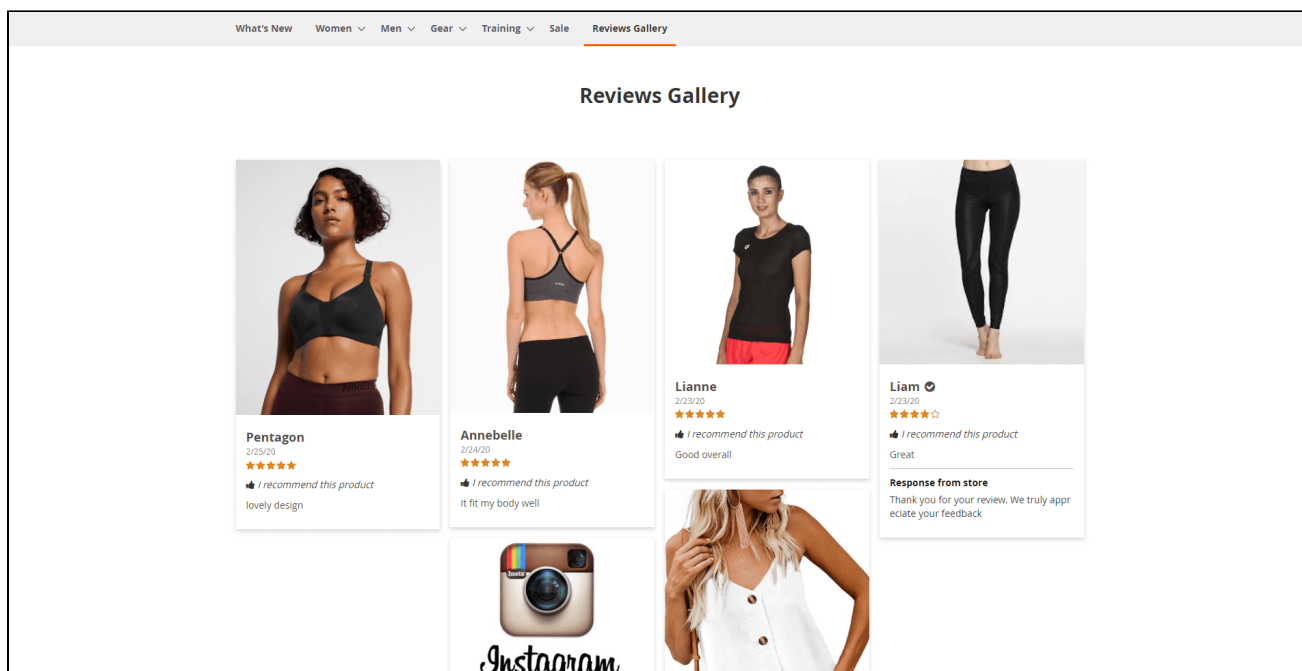

- Reviews from consumers will be marked as verified purchased.

- Review details display in the popup when customers click on a review.

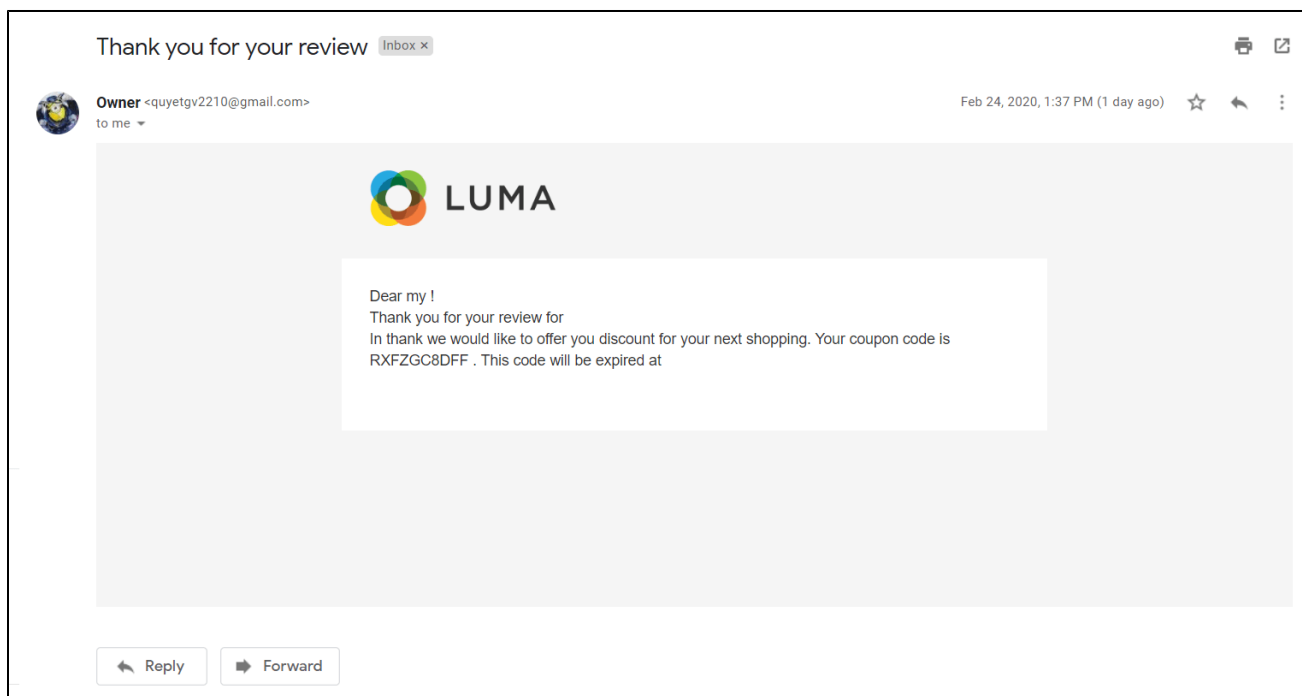

View all the feedback in the Reviews Gallery page

+ The reviews are sorted by time order, the first photos added to the reviews are shown in the gallery and the popups.

Receive coupon code for the rating

+ After writing a review, if admin enabled Coupon for Review on the backend, whether the customers have received a reminder email or not, they would receive a coupon code via email.

Update

- When a bug fix or new feature is released, we will provide you with the updated package.
- All you need to do is repeating the above installing steps and uploading the package onto your store. The code will automatically override.

- Flush the configure cache. Your store and newly installed module should be working as expected.
-

Support

- We will reply to support request within **2 business days**.
- We will offer **lifetime free update and 6 months free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
- Support **DOES NOT** include other series such as customizing our products, installation and uninstallation service.
