Highlight Features

Payment Gateway

For Admin

- Use new Paya API.

- Use tokenization and saved cards.
- AVS/CVV verification.
- Support direct refund.
- Choose Authorize Only/Authorize and Capture.
- Restrict payments from specific countries.
- Delete Account Vault Paya when deleting a card from Magento.
- Manage all Paya transactions easily (both in Magento & Paya dashboard).

For Customer

- Check out easily with Paya form.
- Allow customers to checkout using credit card payment.
- Support Save-card function for logged in customers in two ways: at the checkout process and on My Account page.
- Allow customers to manage Paya saved credit cards.
- Security Standard: PCI DSS Compliance.

System Requirements

Your store should be running on Magento 2 version 2.2.x, 2.3.x or 2.4.x.

Connect Paya account with Magento

+ First, admin needs to connect Paya account with Magento store. On the admin sidebar, select **Paya > Settings**. Go to Configuration page, under **Sales** tab, select **Payment Methods**.

The screenshot shows the Magento 2 Configuration page. On the left sidebar, the 'SALES' tab is selected and highlighted with a red box. Below it, the 'Payment Methods' option is also highlighted with a red box. The main content area shows the 'OTHER PAYMENT METHODS' section with a list of payment methods: Klarna, Amazon Pay, Zero Subtotal Checkout, Cash On Delivery Payment, Bank Transfer Payment, Payeezy, Check / Money Order, Purchase Order, and Authorize.Net. The Amazon Pay method is expanded, showing a description and a 'Configure' button. At the top right of the configuration area is a 'Save Config' button. At the bottom right, there is a 'Tutorial Menu' button and a 'Leave message' button.

+ Under the payment settings, expand **Paya** section to set the configuration for the extension.

+ Required Settings

- Fill the necessary information to connect Magento with Paya account.
- **Sandbox Mode Enabled:** Choose **Yes** to enable the test mode for the extension.

Required Settings

➕ After entering the credentials, click **Save** button to save the connection.

Configuration

➕ On the admin sidebar, select **Paya > Settings**. Go to **Configuration** page, under **Sales** tab, select **Payment Methods**.

➕ Under the payment settings, expand **Paya** section to set the configuration for the extension. Set the configuration for Paya payment on **Paya Form Gateways**.

- **Enable:** Choose **Yes** to enable Paya Form Gateways.
- **Title:** Set the title for the payment method on the checkout page
- **Payment Action:** there are two available options:
 - **Authorize Only:** check for the card for validity but not charge the account yet until the order is approved and invoiced.
 - **Authorize And Capture:** charge the debit/credit card at the time of placing order.
- **Save Customer Cards Token:** Allow customers to save credit cards for future purchases. Customers' credit card info will be tokenized for security purposes.
- **Delete Account Vault Paya When Deleting A Card:** Select yes to delete Account Vault in Paya when deleting a card from Magento.
- **Payment from Applicable Countries:**
 - **All Allowed Countries:** Enable all allowed countries to make payment.
 - **Specific Countries:** Restrict some countries by unselecting them from the **Payment from Specific Countries**.

[blocked URL](#)

- **New Order Status:** Select status for new orders with Paya payment. There are two options: **Processing** and **Suspected Fraud**.
- **Sort Order:** Set the position of the payment in the payment methods list.
- **Minimum Order Total:** Set a value for the minimum order value. If the order amount is less than this value, Paya payment method will not be displayed on the checkout page. This setting is applied with the authorized payment feature only.
- **Maximum Order in Total:** Set a value for the minimum order value. If the order amount is less than this value, Paya payment method will not be displayed on the checkout page. This setting is applied with the authorized payment feature only.

Update

- When a new update is available, we will provide you with a new package containing our updated extension.
- You will have to delete the module directory and repeat the installation steps above.
- Flush the config cache. Your store and newly installed module should be working as expected.

Support

- We will reply to support requests within **2 business days**.
- We will offer **lifetime free update and 6 months free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
- Support **DOES NOT** include other series such as customizing our products, installation and uninstallation service.

Once again, thank you for purchasing our extension. If you have any questions relating to this extension, please do not hesitate to contact us for support.
