Introduction

Product Feed for Magento 2 by Magenest is a powerful tool to promote your products.

Feature

- Flexible Product Feed configurations.
- Easily generate product feeds.
- Customizable feed templates.

System Requirements

Your store should be running on **Magento 2 CE & EE version 2.2.x and 2.3.x**

Configuration

From the Admin sidebar, choose **Marketing > Product Feed > Configuration**, go to the **Configuration** page.

Under the **Mail Settings** section:

- **Enable:** Choose “**Yes**” to enable the email notification for store owners.
- **Confirmation Template:** select a template for the email on the drop-down list.
- **Send Email To:** Enter the receiver email.
- **Send Mail When:** select a stage to send the email.

Create a new feed

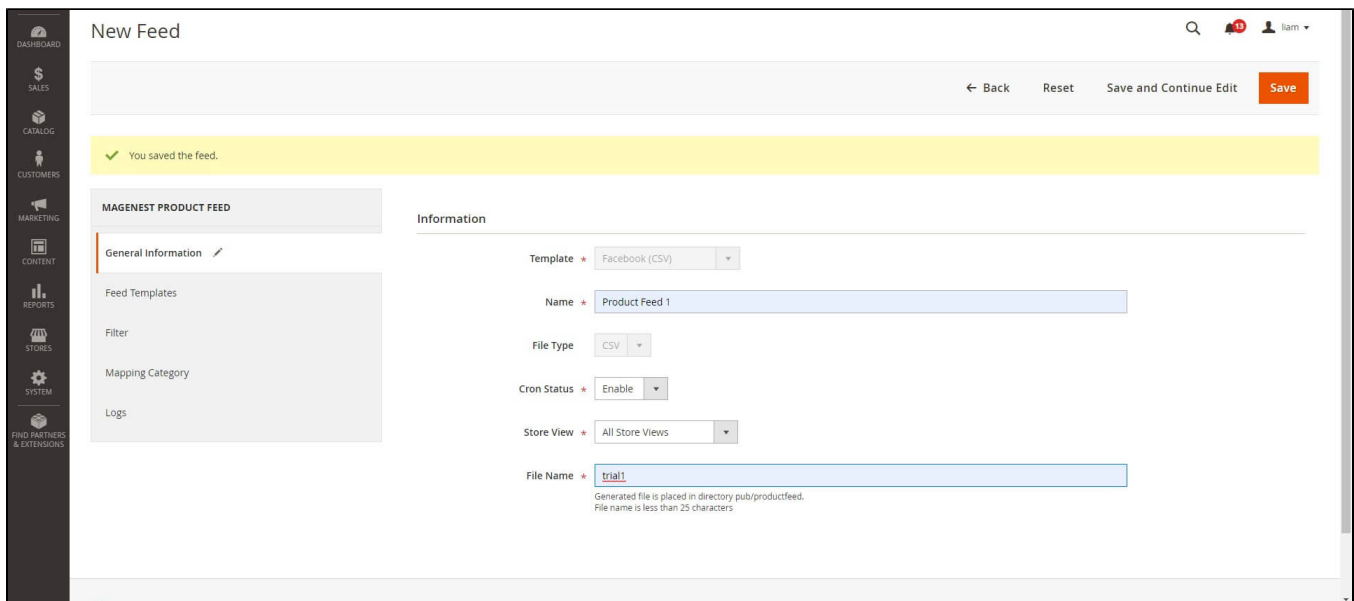

Step 1: Choose a template for the feed

Select the file format on the **Template** field. There are 2 file formats: CSV, and XML.

Step 2: Fill in the General Information field

- + **Name:** enter a name for the feed.
- + **Cron Status:** Choose "**Enable**" send the email automatically.
- + **Store View:** Choose a store to get the products and generate the file.
- + **File Name:** enter the name of the file after being generated.

Step 3: Choose Template Type

- + For the template format is XML:
 - **Title Feed:** Title of the feed.
 - **Description:** Description of the feed.

+ For the template format is CSV:

- Choose the character separating the fields when exporting the file in the “Field Separate” field.
- Select the character surrounding the fields when exporting the file in the “Field Around” field.
- To get the header field when exporting the file, choose “Yes” in the Include Field Header field.

+ **Fields Map:** Allow adding any value you want into the Fields Map field. The added values must be the standard of Google or Facebook.
