Introduction

Notification box for Magento 2 is a useful tool that informs your customers about important news such as order status updates, new products, available promotions & discounts, etc. in real-time in a quick and effective manner.

Features

Features for admin

- Push unlimited notifications for customers
- Create a notification box in the header section
- Set up 2 notification modes: Send immediately or schedule time
- Set up conditions to send notifications based on customer behaviors/customer attributes
- Create various types of notifications including 3 default types: Abandoned cart reminders, Order status update, Review reminders
- Customize content, images, and URLs for each notification
- Design notification box
- Support notifications for guests
- Report performance of notifications
- Display subscription popup for unsubscribed customer

Features for customers

- Receive 2 types of notification: Magento Popup Noti and Web Push.
- View all new important notifications in the notification box.
- View notifications on My Notification page.
- Mark important notifications, delete notifications, filter notifications by type.

System Requirements

Your store should be running on **Magento CE EE 2.3.x, 2.4**

Configuration

+ On the admin sidebar, go to **Stores > Configuration > Magenest > Notification Box**

General Settings

+ General:

- **Enable module:** Choose Yes to enable the Notification box extension.

⚠ Note: Your site has to have SSL to enable the Notification box extension.

- **Maximum notifications in My Notifications on My Account Page:** Set the maximum numbers of notification could be displayed in **My Account > My Notification tab**
- **Server key** and **Sender ID:** You need the server key and sender ID to enable the sending notification box features via Firebase. Click “How to get Server Key and Sender ID” to see the detailed guideline.

Update

- When a bug fix or new feature is released, we will provide you with the module's new package.
- All you need to do is repeating the above installing steps and uploading the package onto your store. The code will automatically override.
- Flush the configure cache. Your store and newly installed module should be working as expected.

Support

- We will reply to support requests within **2 business days**.
- We offer **lifetime free updates and 6 months of free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
- Support **DOES NOT** include other services such as customizing our products, installation, and uninstallation service.
