- Set up sticky promo bars.
- Duplicate promo bars with ease.
- Have a click report to see how effective is your promo bar **(NEW)**
- Admin can schedule active date for a promo bar **(NEW)**

System Requirements

Your store should be running on **Magento 2** version **2.3.x** and **2.4.x**

Configuration

Promo Bar extension allows the customer to create the promo bar on the front end with the call-to-action button, therefore, there are two main parts in the configuration: create a call-to-action button and set up a promo bar.

Create Call-to-Action Buttons

 On the Admin sidebar, go to **Marketing > Magenest Promo Bars > Buttons**.

+ In order to create a Call-to-Action button, click on **Add New Button** on the top right.

+ On the Edit Button page

Tutorial Menu

- **Status:** Select the status for the new button between Enable and Disable.
- **Button Title:** Enter the title for the button which is shown in the back-end for management.
- **Content:** Enter the call-to-action phrase for the button which is shown on the frontend. Then use the edit tool style the button title (color, font, size, etc).
- **Text Size (px):** Set the size for the text. Since the size in the **Content** field is limited to 36pt, this **Text Size** field is added for the unlimited font size (px).
In case both font size settings are set up, the value in the **Text Size (px)** will be taken.
- **Color for Text:** Select the text color in the palette.
- **Hover Color for Text:** set the color of the text when the button is hovered.
- **Button Settings:** Adjust each field on the adjustment tool to set the button shape and text alignment.
- **Color for Button Background:** Select the background color for the button.
- **Hover Color for Button Background:** Set the background color for the button when being hovered.
- Then set for the button border on **Border Style, Border Width, Color for Button Border** and **Hover Color for Button Border**.
- View the layout of the new button after each change on the live preview section then click **Save** when complete.

Setup a new Promo Bar

- **Desktop Bar Setting:** set the display for the bar on desktop view.
- **Mobile Bar Setting:** set the display for the bar on the mobile view.

- **Sliders:** Create the multiple sliders for the promo bar. Click on **Add Slider** button to add more slider.
- Select one slider then click on **Edit** button under the **Action** column. Enter and modify the content for the slider on the **Content** field.
- **Text size (px):** Enter the size of the slider text.
Since the size in the Content filed is limited to 36pt, the **Text Size** field is added which allows unlimited font size (px). In case both font size settings are set up, the value in the text size (px) will be taken.
- **Time life for Each Content (seconds):** Set the time to switch the sliders.
- **Text Color:** Set the text color by choosing in the palette.
- **Background Color:** The background color of the promo bar. In case you use the background image, this field is unnecessary and vice versa.
- **Text Vertical Alignment:** The slider content alignment on the promo bar (0px - 50px).

+ Mobile Bar Setting

This section is the configuration for the promo bar on the mobile view.

- **Use same configuration as desktop:** Choose **Yes** if the configuration for mobile is similar to the desktop configuration. If choose **No**, set the configuration for the mobile bar setting with some fields below.
- **Breakpoint:** set the breakpoint. Mobile promo bar style will be applied if the screen width is less than breakpoint value
- **Bar Height:** Adjust the tool to set the mobile bar height (30px - 150px).

- **Background Image Setting:** use the adjust tool to set for the the background image.
- **Text Size (px):** Enter the size of the slider text.
- **Text vertical alignment:** The slider content alignment on the promo bar (0px - 50px).
- **Button Position:** Change the button alignment on the bar.

Mobile Bar Setting

Use same configuration as desktop

0px

Button Position

☐	Show on the left		
☒	Show on the right		24%
	Up-Down		25px

⚠ Note:

- We do not recommend setting **2 sticky promo bars on the same site**. It might cause errors.
- You can create a cron job to update the button of the promo bar as soon as the button is edited.

+ Save the configuration then clear cache in **System > Cache Management**.

Manage Widgets

+ To manage a promo bar widget, go to **Content > Widgets**.

+ On the **Widget** management page, you can edit the existing widget or add a new one by clicking on the **Add Widget** button.

+ On the New Widget page

★ Setting

- **Type:** Select **Promo Bar**
- **Design Theme:** Select your design theme.
- Then click on **Continue**

★ Storefront Properties

- **Widget Title:** Enter the name of the widget
- **Assign to Store Views:** Select your desired store view.
- **Sort Order:** Set the priority order for your promo bar on the front end display.
- **Layout Updates**
 - **Display on:** Select a page to display the promo bar widget.
 - **Container:** Select a position to display the promo bar on the front end.

Manage promo bars

Mass Action

+ To delete or duplicate bars, go to **Magenest Promo Bars > Bars**. On **Bars** page, select bars to delete on the grid, then select **Delete** or **Duplicate** on the mass actions drop-down list.

The screenshot displays the 'Bars' management interface. On the left is a dark sidebar with icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Demoguide, and Reports. The main content area has a header with a search icon, a notification bell with '72' alerts, and a user profile 'trang'. Below the header is a table with one record, 'Bar 1'. An 'Actions' dropdown menu is open over the table, showing 'Delete' and 'Duplicate' options. The table has columns for 'Title', 'Image', and 'Action'. The 'Image' column shows a cartoon character. The 'Action' column has an 'Edit' link. The table also includes a 'Search' bar, a 'Reset Filter' link, and a '1 records found' status. A pagination bar shows '20 per page' and '1 of 1'.

Disable a bar

+ On the admin sidebar, go to **Content > Widgets**. On the **Widgets** page, select the widget that contains the promo bar need disabling.

[blocked URL](#)

+ On the **Widgets Management Page**, scroll down to see the **Layout Updates** section. Click on the trash bin icon to disable the promo bar on the store-front.

[blocked URL](#)

+ Click Save to save the changes. Then go to **System > Cache Management** to clear the cache.

Storefront Display

+ The Promo Bar display on the front end.

- **Bar position:** Page Header Container

- Bar position: Page Top

- Bar position: Page Footer Container
