## Introduction

Banner Slider for Magento 2 lets merchants create and use sliders as banners on product listing pages. This allows you to promote your content and navigate traffic on your website.

## Key featureblocked URL

### For Admin

- Choose between three types of banners and sliders.
- Create sliders in Magento 2 backend.
- Upload photos to use as a slide.
- Add links to slides.
- Highly customizable appearance.
- Multiple slider animations.
- Receive the banner/slider click reports (**NEW**)
- Import banner template (**NEW**)

### For Customer

- Quickly access the outstanding product on the shop page.

### System requirement

Your store must be running on:

- **Magento Open Source 2.1.x, 2.2.x, 2.3.x, 2.4.x**
- **Magento Commerce 2.1.x, 2.2.x, 2.3.x, 2.4.x**

---

## Configuration

 On the **Admin sidebar**, choose **Banner Slider > Manage Banner Slider**

+ On the **Slider Page**, the customer can manage the available slider or create a new one.

The screenshot shows the 'Banner Slider' management page. At the top right, there is a search icon, a notification bell with '7', and a user profile 'admin'. Below this is a large empty text area and an 'Add New Slider' button. The main content area includes a table with 10 records. The table has columns for 'ID', 'Name', 'Type', 'Status', and 'Action'. The status column shows 'OFF' in red for records 1-3 and 'ON' in green for records 4-7. There are also filters, a 'Default View' dropdown, and a 'Columns' dropdown. A pagination bar shows '20 per page' and '1 of 1'.

ID	Name	Type	Status	Action
1	Template 1	Slider	OFF	Select
2	Template 2	Slider	OFF	Select
3	Template-9	Slider	OFF	Select
4	Template 8	Banner	ON	Select
5	Slider 1	Slider	ON	Select
6	slider syncing 1	Slider Syncing	ON	Select
7	slider syncing 2	Slider Syncing	ON	Select

★ There are 3 types: **Banner, Single Slider, 2 Sliders with Synchronized Transition.**

★ You can create a new banner.

## Create a Banner

+ Click on the **Add New Slider** button on the **Manage Banners/Sliders** page

This screenshot shows the 'Banner Slider' management page with a sidebar on the left. The sidebar contains icons for 'CATALOG', 'CONTENT', 'BANNER SLIDER', and 'SYSTEM'. The main content area is similar to the previous screenshot but shows 11 records in the table. The status column shows 'OFF' in red for records 121, 122, 111, and 107, and 'ON' in green for records 96, 112, and 115. There are also filters, a 'Default View' dropdown, and a 'Columns' dropdown. A pagination bar shows '100 per page' and '1 of 1'.

ID	Name	Type	Status	Action
121	Banner	Banner	OFF	Select
122	Banner	Banner	OFF	Select
96	Banner Slider	Slider	ON	Select
111	Slider 1	Slider	OFF	Select
112	slider syncing 1	Slider Syncing	OFF	Select
115	Slider Syncing 2	Slider Syncing	ON	Select
107	Template 1	Banner	OFF	Select

+ On **Slider Setting** section:

- **Enable or disable the slider/ banner**
- **Slider/ Banner Name:** insert the name of the banner/slider
- **Type:** Choose Banner's type

Banner

Single Slider

2 Sliders with Synchronized Transition

- **Active From Date:** Choose the day to activate the banner/slider.
- **Active to Date:** Choose the day to deactivate the banner/slider.

**Add custom CSS to style your new banner**

- Click on the **Edit** icon next to Banner, you'll see the **Style Configuration** box. You could add custom CSS there to style your new banner.

## Add a New Banner with the configuration feature

If you do not have a CSS banner available, you could add it with the Banner Container configuration feature.

### + Customize the **Banner Container**

- Click on the **Edit** icon next to the **Banner Container**

- **Image File:** Upload a new background image for the banner.
- ⚠ Please note that you can only upload the image with png, .jpeg, .jpg. format and a maximum size of 2MB
- **Image (mobile) File:** Upload a new background image for Mobile Please note that you can only upload the image with png, .jpeg, .jpg. format with a maximum size of 2MB
- ⚠ Note: you can choose custom upload or Select from Gallery.
- **Background Image Attribute**
  - **Position:** Choose a position for the image
  - **Repeat:** Choose if the image can be repeated to be fully displayed in the container when its size is smaller than the container
  - **Size:** Choose how the image is displayed in the container (Cover, Contain or Auto)
  - **Padding and Margin:** adjust the dimension of the banner according to your requirement. View the effects of your changes on the demo banner on the left side.
- **Choose Category:** select one category on the drop-down list to get data for the banner.
- **Banner/Slider URL:** You can fill in a URL under the http/https, ftp format to redirect users to an external link when they click on the banner.
- **Opening Banner/Slider URL in a new tab:** Choose **Yes** to set when users click on Banner with URL, there will be a new tab
- **Custom Class:** enter the name of the custom class which is defined on the Banner Configuration.

## + Customize the Banner Content

- Click on the **Edit** icon next to the **Banner Content**

- **Animation:** Choose banner content animation.

There is a wide range of options for you to select according to your needs

- **Animation Delay:** Set the time (per second) to delay the banner content's effect.
- **Width, Height:** Set size for the content of Banner
- **Padding and Margin:** Adjust the dimension for the banner padding and margin to fit your requirement.

View the effects of your changes on the demo banner on the left side.

- **Background Color, Opacity:** Choose the background color for the content of Banner

## + Custom the Content Box

If you click on the **Edit icon** in the **Content box**, you'll be able to configure the content.

- **Type:** You can select Button, Text, or HTML

If you select HTML you'll be able to edit the banner button according to the image below

★ Once you select **Button**, you'll be able to edit the banner button according to the image below

★ Once you select the Text type, you'll be able to configure the banner text like the image below

★ On tab **Slider Position**:

- **Design Theme**
- **Assign to Store Views**
- **Sort Order**: Select the order to display the banner/slider on the front end
- **Layout Updates**: Set up the banner/slider position

## Create a Slider

+ Choose the type **Single Slider**. Under the quick preview box, click on the **Add New Slider Item** button to add the number of sliders that you expected.

+ Click on each Slider Item button on the left to configure for each slider.

+ On **Slider Configuration**:

- **Items/Slider**: choose the number of slider items that will appear at the same time in a slide.
- **Slider Animation**: Choose Slider animation
- **Animation Delay (s)**: Set the time (per second) to delay the slider's effect.

★ **Note**: Animation delay must be smaller than Auto Play Speed

- **Margin (Spacing between items):** set the distance between the slider items. The unit for space is Px.
- **Arrows:** display the switch button aside.
- **Dots:** display the dots on the slider footer when switching the sliders.
- **Auto Height:** synchronize the height of slider backgrounds with different sizes. The largest height will be set as the default height.
- **Loop**
- **Auto Play**
- **Draggable**
- **Center Mode**

**+ Under Style Configuration**

- **Custom Class:** Enter the name of the custom class that is defined in the below section.
- **Custom CSS:** define the custom CSS to style the slider.

**+ On Item Configurations and Item Content Configurations, please refer to the instruction for this part of Banner Settings**

## Create 2 Sliders with Synchronized Transition

**+ Choose the type 2 Sliders with Synchronized Transition.** There will be 2 default sliders created. These sliders will be displayed on the front end at the same time and interact with each other.

**+ On each slider configuration, click on the Add New Slider Item button to create new slider items.** Note that when a number of slider items created on one slider, an equal number of slider items will be generated automatically on the other slider.

**Note:** There will be a number of slider items created automatically on one slider. This number equal to the number of slider items added on the other slider.

The item on one slider will be displayed at the same time as the item in the same order on the other slider. For example, slider item 2 in slider 1 will be displayed with slider item 2 in slider 2 at once.

## Import Banner/Slider

+ On the Admin sidebar, choose **System > Data Transfer > Import**

[blocked URL](#)

+ On the Import page

- **Entity Type:** Choose Banner Slider import
- **Import Behavior:** Choose Type Import

[blocked URL](#)

+ You can download the sample file by clicking Download Sample File

[blocked URL](#)

+ Click **Choose File** to select the file to import.

Find the CSV file that you prepared to import and click Open.

After that, click **Check Data** button

Wait a few moments for the validation process to complete.

If the import data is valid, the following message appears:

[blocked URL](#)

If the file is valid, click Import.

The import process continues to the end of the data unless an error is encountered.

## Report Clicks Banners/Sliders

+ On the Admin Sidebar, go to **Banner Slider > Reports Click Banners/Sliders**

The screenshot shows the Magento Admin interface for the 'Banner Slider' section. The sidebar menu on the left has 'Report Clicks Banners/Sliders' highlighted with a red box. The main content area displays a table with 10 records found. The table has columns for Name, Type, Status, and Action. The records are as follows:

Name	Type	Status	Action
Template 1	Slider	OFF	Select
Template 2	Slider	OFF	Select
Template-9	Slider	OFF	Select
Template 8	Banner	ON	Select
Slider 1	Slider	ON	Select
slider syncing 1	Slider Syncing	ON	Select
slider syncing 2	Slider Syncing	ON	Select
Template 3	Banner	ON	Select
Slider Syncing 3	Slider Syncing	ON	Select
Slider Syncing 4	Slider Syncing	ON	Select

+ On the **Report** page, the admin can see the **Slider Name, Clicks total, and Click Date.**

One IP address can only be counted as one click.

⚠ Note: The report only includes the number of click on the linked sliders (without the number of click on the button)
