Introduction

Sell On Instagram for Magento 2 by Magenest is a powerful tool to sync your products on Magento 2 site to your Facebook shop or Instagram shop.

Highlight Features

- Create multiple feeds for product feed.
- Synchronizing and updating a specific or all Products from Magento 2 store into the Facebook (Instagram) shop with multiple stores
- Mapping Magento 2 product attributes and Facebook attributes.
- Tracking order if it is from Facebook (Instagram) shop
- Sync product manually or by schedule

System Requirements

- Your store should be running on Magento 2 Community Edition version 2.3.x, 2.4.x
- Instagram Shopping Scope you can navigate here https://help.instagram.com/321000045119159
- To create a shop on Instagram you can navigate here https://business.instagram.com/shopping/setup

Configuration

On the Admin sidebar, choose Store > Setting > Configuration > Magenest > Sell On Instagram

Turn on shopping on Instagram

To turn on shopping, you must connect Instagram profiles that are switched to business profiles. These profiles must be approved for Instagram Shopping before you can start tagging products in your posts or Stories.

(Click here to get more information)

Set Up a Business Account on Instagram

Click here to get information

Set Up your shop

Go to your Instagram profile

Select the hamburger icon in the top right

Settings > Business > Set Up Instagram Shopping

<	Business		
Promotion Payments	;		>
Branded Content			>
Saved Replies			>
Frequently Asked Qu	uestions	Off	>
Minimum Age			>
Set Up Instagram Sh	opping		

Follow the steps to submit your account for review

You will now have to wait for the approval of Instagram Shopping on your account. This can take as little as 24 hours and up to 1 week.

< Options	
Business Settings	
Promotion Payments	0 New 义
Shopping	>
Branded Content Approvals	>
Switch Back to Personal Account	

When you're approved and the **Shopping** button appears in your Business settings, you will be able to click it to view your active catalogs and products Select a product catalog which in your case, would be the one you created in Facebook.

Tag Products in Your Instagram Posts

Add a photo to Instagram as you normally would (select the + icon, choose your image, add filters, a caption, etc)

Select Tag Products

Tap the photo where you'd like a product tag to appear, then select the appropriate product from your catalog

Tap Done and preview your post

Share your new, shoppable Instagram image!

Update

- When a new update is available, we will provide you with a new package containing our updated extension.
- You will have to delete the module directory and repeat the installation steps above.
- Flush the config cache. Your store and newly installed module should be working as expected.

Support

- We will reply to support requests within 2 business days.
- We will offer a lifetime free update and 6 months of free support for all of our paid products. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
- Support DOES NOT include other series such as customizing our products, installation, and uninstallation service.

Once again, thank you for purchasing our extension. If you have any questions relating to this extension, please do not hesitate to contact us for support.
